the cover of this book is a Pacific yew tree found in the ancient forests of the Pacific Northwest The bark of the Pacific yew
tree produces Taxol found to be a highly effective drug against ovarian and breast cancer Taxol blocks mitosis during
eukaryotic cell division The supply of Taxol from the Pacific yew tree is vanishingly small however A single 100 year old tree
provides only about one dose of the drug roughly 300 mg For this reason as well as the spectacular molecular architecture of
Taxol synthetic organic chemists fiercely undertook efforts to synthesize it Five total syntheses of Taxol have thus far been
reported Now a combination of isolation of a related metabolite from European yew needles and synthesis of Taxol from that
intermediate supply the clinical demand This case clearly demonstrates the importance of synthesis and the use of organic
chemistry It s just one of the many examples used in the text that will spark the interest of students and get them involved in
the study of organic chemistry *Study Guide, Student Solutions Manual* John R. Gordon,1998
