Using the Example of Cambridge Analytica](#), 2023-02-01 Pre University Paper from the year 2022 in the subject Politics Region USA grade 1 0 language English abstract This paper questions if democratic elections are still even possible at all The goal of this paper is to explain which methods Cambridge Analytica used to try to influence the 2016 presidential election In that course it aims to answer the question if these practices are a threat to democratic elections The company in question was called Cambridge Analytica a data analysis and political consulting company which used user data from Facebook and other social media services to manipulate voters behaviour It is the 8th November 2016 day of the 58th presidential election in the United States of America The republican Donald Trump and his vice president candidate Mike Pence are competing against the democrat Hillary Clinton and her vice president candidate Tim Kaine According to surveys and polls prior to the election Clinton has higher chance of winning and is expected to become the 45th president of the United States A big surprise was revealed to the world that day when for the fourth time in American history a presidential candidate was elected without actually having the majority of citizens votes Donald Trump won the election and took office as the 45th president of the United States on January 20 2017 But what if this election was possibly manipulated What if a single company had the power and the possibilities to completely analyse predict and influence voters behaviour This might sound like an idea from a science fiction movie but it is reality and it happened without the world even realising it After dealing with the case of Cambridge Analytica one might think that electoral manipulation using data seems to be alarmingly easy in the digital age *Signs of Life in the USA* Sonia Maasik, Jack Solomon, 2011-12-01

Searcher ,2008-11 *Leadership 2.0 in processes of a sustainable change* Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic

realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover
