Read the short passage and answer the questions.

The Dog and the Shadow

It happened that a Dog had got a piece of meat and was carrying it home in his mouth to eat it in peace. Now on his way home, he had to cross a plank lying across a running brook. As he crossed, he looked down and saw his own shadow reflected in the water beneath. Thinking it was another dog with another piece of meat, he made up his mind to have that also. So he made a snap at the shadow in the water, but as he opened his mouth the piece of meat fell out, dropped into the water and was never seen more.

rich data set from Ghana When years of schooling are used to measure the accumulation of human capital there are virtually no returns to schooling in the private sector Replacement of years of schooling by reading and mathematical ability does show positive returns to acquired skills However these rates of return may be of little use to governments when making schooling investment decisions because such decisions are much more complex than the investment decisions of individuals In particular many government investments in education are designed to raise rates of return to schooling by raising school quality but decisions by individuals assume that both rates of return and school quality are exogenous
