High-Performance Coaching for Managers William J. Rothwell,Behnam Bakhshandeh,2022-07-05 Coaching is a necessary skill for managers It is important as a fundamental part of an organization s talent efforts including talent acquisition development and retention strategies For a coaching program to succeed in an organization it should be recognized as a useful approach throughout the organization and become part of the fabric of the corporate culture Performance Coaching for Managers provides an important tool for organizations to use to train their managers on coaching This book differs significantly from other books in the coaching market Many books on coaching cast coaches as facilitators who question their clients the coachees helping them to articulate their own problems formulate their own solutions develop their own action plans to solve problems and measure the success of efforts to implement those plans That is called a nondirective approach But this book adopts a directive approach by casting the coach as a manager who diagnoses the problems with worker job performance and offers specific advice on how to solve those problems While there is nothing wrong with a nondirective approach it does not always work well in job performance reviews in which the manager must inform the worker about gaps between what is needed the desired and what is performed the actual The significant difference between what is currently available in the market and what is offered in this book is the authors collective experience of over 70 combined years of hands on research and delivery experiences in the Human Resources Development field According to the Harvard Business Review 2015 workers generally expect their immediate supervisors to give them honest feedback on how well they do their jobs and specific advice on what to do if they are not performing in alignment with organizational expectations When workers do not receive advice but instead are questioned about their own views they regard their managers as either incompetent or disingenuous Effective managers should be able to offer direction to their employees After all managers are responsible for ensuring that their organizational units deliver the results needed by the organization If they fail to do that the organization does not achieve its strategic goals This book

gives managers direction in how to offer directive coaching to their workers Unbroken Rommel Sergio,2022-11-12 At first glance the reader might think that this is yet another book of a personal journey Indeed it is a record of real life events that shaped the author s life in a way that is relevant to the world of community leadership What makes this book unique however is that it started to take shape during a global pandemic an uncertain time when people somehow knew they would never be the same again While the effects of the last few years are still being felt the author by telling his story offers hope through a series of life lessons all stemming from the distillation of his adventures He has narrated what he calls trials and triumphs and described in detail the particular set of travails that he faced very early on in life He has used these experiences to inculcate values we all could learn from The author invites readers from all walks of life to travel with him on this journey not only back in time but also forward into the future Forearmed with courage and fortitude and with hope as our greatest ally we could all by engaging more with the community live a life of service to humanity a life of self actualization **Success Evolution- A Simplified Way** , World War for Jobs Henry D Jacob, Beulah Evelyn,2025-12-05 A war is coming This time it is about jobs On one side we have millions of people entering the job market every year and on the other side millions of jobs are disappearing due to automation AI and robotics Even if you are already employed how safe is your job The nature of jobs is changing The expectations of leadership are changing and the roles of leaders themselves are changing You are not only competing with other fellow human beings but also with machines With artificial intelligence AI and automation combined with digital first experiences technology is no longer just automating businesses but gearing them on auto pilot As a result businesses no longer need people for the most part of their operations For the first time in human history computers and machines are becoming intelligent enough to run businesses and the world independently So instead of technology helping humans humans have started helping technology The only way you can survive in this changing professional and business world is by adopting a comprehensive survival framework Whether you are a seasoned professional or an aspiring graduate you can use this framework to accelerate your career David Bach John David Mann,2020-12-29 Amazon com 1 27 6 1 Angela Elena Wu Jamie Marra NanaQ YouTuber KOL 45 200 Angela Elena Wu 2021 Jamie NanaQ YouTuber Tony Robbins 1 Money Youtube Marie Forleo Everything is Figureoutable YouTube MarieTV Simon Sinek Start with Why Vicky Robin Your Money or Your Life Tony Hsieh Zappos Delivering Happiness 30 Grant Sabatier Financial Freedom Millennial Money Candi Carter The View The Oprah Winfrey Show Farnoosh Torabi Podcast So Money When She Makes More Robin Sharma The Monk Who Sold His Ferrari The 5 AM Club Brendon Burchard 1 High Performance Habits Scott Harrison Thirst Jean Chatzky Today Podcast Her Money Sarah Jakes Roberts Jon Gordon The Energy Bus The Power of Positive Leadership 70 100 10 Benjamin P Hardy Inc com Dottie Herman Douglas Elliman 1 Ken Blanchard 1 The New One Minute Manager The Secret Erin Lowry Broke Millennial Takes On Investing Dr Jennifer Aaker Louis Barajas The Latino Journey to Financial Greatness 1 Bobbi Rebell How to Be a Financial Grownup Michael Hyatt
