the end of the day week or month the candle for that time period is finalized A candlestick consists of the body with an upper or lower wick or shadow Most candlestick charts show a higher close than the open as either a green or white candle The opening price as the bottom of the candle and the closing price as the high of the candle Also most candlestick charts show a lower close than the open represented as a red or black candle with the opening price as the top of the candle body and the closing price as the low of the candle body and much more By the time you finish this book I think you ll agree that candlesticks are the best type of charts for most traders to use for trading price action patterns
