*Teaching Systematic Synthetic Phonics in Primary Schools* Wendy Jolliffe, David Waugh, Angela Carss, 2012-05-18 The government prioritizes systematic synthetic phonics as a key strategy in the teaching of reading and this text supports trainee teachers working towards primary QTS in how to use phonics effectively The text begins by examining the central role of phonics in the teaching of reading drawing on recent research and initiatives It goes on to cover the essential knowledge trainees need to acquire themselves for the teaching of phonics to children Accessible and relevant the text uses case studies and useful research to support trainees in becoming competent and confident in the teaching of phonics Supplement this text with the companion audit and test book Teaching Systematic Synthetic Phonics Audit and Test About the Transforming Primary QTS series This series reflects the new creative way schools are beginning to teach taking a fresh approach to supporting trainees as they work towards primary QTS Titles provide fully up to date resources focused on teaching a more integrated and inclusive curriculum and texts draw out meaningful and explicit cross curricular links

*Nurturing Compassionate Connections* Angela Hodgkins, 2025-07-21 In a profession where empathy and compassion form the bedrock of impactful interactions yet remain relatively unexplored this book endeavours to be a beacon of inspiration and guidance The book explores what compassionate relationships might look like and translates extensive research into actionable steps that practitioners can easily integrate into their routines Chapters Include guidance for fostering effective empathetic relationships with colleagues and young children as well as extending empathy to parents and carers Offer suggestions for supporting and promoting positive behaviour with guidance on embracing empathy in challenging situations Prioritise practitioner wellbeing and include real life case studies of nurturing connections recognising both the demands and satisfaction of the profession Are full of reflective prompts and activities to reshape the narrative of early years practice and equip practitioners to navigate challenges with resilience Nurturing Compassionate Connections advocates a strengths based approach and aspires to redefine the landscape of compassionate practice enriching the journey of those who care for young children It is essential reading for all early years practitioners and allied professionals

**Frontiers in the Acquisition of**

**Literacy** Claire M. Fletcher-Flinn,2015-09-28 Learning to read and to spell are two of the most important cultural skills that must be acquired by children and for that matter anyone learning a second language We are not born with an innate ability to read A reading system of mental representations that enables us to read must be formed in the brain Learning to read in alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols letters in print words with pre existing phonological sound and semantic comprehension cognitive systems for language Although spelling draws on the same representational knowledge base and is usually correlated with reading the acquisition processes involved are not quite the same Spelling requires the sequential production of letters in words and at beginning levels there may not be a full degree of integration of phonology with its representation by the orthography Reading on the other hand requires only the recognition of a word for pronunciation Hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them The learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions Most children learn to read and spell their language at the same time thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition Lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education The purpose of this Research Topic is to summarize and review what has been accomplished so far and to further explore these general issues Contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of literacy including cross orthographic research
