Blue Carbon Dynamics of the Indian Ocean Abhra Chanda, Sourav Das, Tuhin Ghosh, 2022-03-21 This book gives an overview of various aspects of blue carbon dynamics from each country bordering the Indian Ocean. Given the importance of the topic of blue carbon, it can be assumed that in the near future more and more researchers from the Indian Ocean countries will pursue environmental research in this domain. This book is a ready reference to all those who are interested to have a holistic understanding about the ground scenario of blue carbon in the Indian Ocean. There are many research institutes situated in the periphery of the Indian Ocean that are devoted to nurturing the new avenues of marine carbon research. Researchers and scholars interested in this domain will find this book provides a good overview wherein all the necessary information on the status and functioning of these blue carbon ecosystems are detailed in a concise way. The book is also helpful to postgraduate students of marine science or those who have a specialization in marine biogeochemistry or chemical oceanography to develop a basic understanding about the very concept of blue carbon from the perspective of the Indian Ocean.

Global Blue Economy Md. Nazrul Islam, Steven M. Bartell, 2022-11-28 A global blue economy is an economic arena that depends on the benefits and values realized from the coastal and marine environments. This book explains the sustainable blue economy as a marine based economy that provides social and economic benefits for current and future generations. It restores, protects, and maintains the diversity, productivity, and resilience of marine ecosystems and is based on clean technologies, renewable energy, and circular material flows.

The Blue Economy Handbook of the Indian Ocean Region Attri, V.N., Bohler-Mulleris, Narnia, 2018-08-03 As humanity enters the Anthropocene epoch, the oceans are more at risk than ever before as a result of the increased exploitation of its resources. The Indian Ocean is the third largest ocean in the world, comprising 20% of the water on the Earth's surface. The sea lanes in the Indian Ocean are among the busiest in the world, with more than 80 percent of global seaborne trade in oil transiting through the Indian Ocean and its vital chokepoints, and an estimated 40% of the world's offshore oil production comes from the Indian Ocean. The importance of this region cannot be underestimated, and there is no doubt that there are many opportunities for economic growth and job creation presented by the waters washing the shores of the Indian Ocean Rim. In order to ensure a desirable future for humanity, it is necessary to make use of the ocean's resources in a sustainable and responsible manner. Climate change is affecting the Indian Ocean negatively, placing a strain on the ability to ensure food security and damaging the economies of small island states that depend on fisheries and aquaculture for their livelihoods. Increasing ocean temperatures and ocean acidification are taking a toll on ecosystems. This book is the first of its kind, providing fresh insights into the various aspects and impacts of the Blue Economy in the Indian Ocean Region, from shifting paradigms to an accounting framework, gender dynamics, the law of the sea, and renewable energy. This handbook aims at increasing awareness of the Blue Economy in the Indian Ocean Region and to provide evidence to policy makers in the region to make informed decisions. The contributions are from a
