Machine Learning with Amazon SageMaker Cookbook Joshua Arvin Lat,2021-10-29 A step by step solution based guide to preparing building training and deploying high quality machine learning models with Amazon SageMaker Key FeaturesPerform ML experiments with built in and custom algorithms

in SageMaker Explore proven solutions when working with TensorFlow PyTorch Hugging Face Transformers and scikit learn Use the different features and capabilities of SageMaker to automate relevant ML processes

Book Description Amazon SageMaker is a fully managed machine learning ML service that helps data scientists and ML practitioners manage ML experiments In this book you will use the different capabilities and features of Amazon SageMaker to solve relevant data science and ML problems This step by step guide features 80 proven recipes designed to give you the hands on machine learning experience needed to contribute to real world experiments and projects You will cover the algorithms and techniques that are commonly used when training and deploying NLP time series forecasting and computer vision models to solve ML problems You will explore various solutions for working with deep learning libraries and frameworks such as TensorFlow PyTorch and Hugging Face Transformers in Amazon SageMaker You will also learn how to use SageMaker Clarify SageMaker Model Monitor SageMaker Debugger and SageMaker Experiments to debug manage and monitor multiple ML experiments and deployments Moreover you will have a better understanding of how SageMaker Feature Store Autopilot and Pipelines can meet the specific needs of data science teams By the end of this book you will be able to combine the different solutions you've learned as building blocks to solve real world ML problems What you will learn Train and deploy NLP time series forecasting and computer vision models to solve different business problems Push the limits of customization in SageMaker using custom container images Use AutoML capabilities with SageMaker Autopilot to create high quality models Work with effective data analysis and preparation techniques Explore solutions for debugging and managing ML experiments and deployments Deal with bias detection and ML explainability requirements using SageMaker Clarify Automate intermediate and complex deployments and workflows using a variety of solutions

Who this book is for This book is for developers data scientists and machine learning practitioners interested in using Amazon SageMaker to build analyze and deploy machine learning models with 80 step by step recipes All you need is an AWS account to get things running Prior knowledge of AWS machine learning and the Python programming language will help you to grasp the concepts covered in this book more effectively

Python Web Scraping Cookbook Michael Heydt, 2018-02-09 Untangle your web scraping complexities and access web data with ease using Python scripts Key Features Hands on recipes for advancing your web scraping skills to expert level One stop solution guide to address complex and challenging web scraping tasks using Python Understand web page structures and collect data from a website with ease

Book Description Python Web Scraping Cookbook is a solution focused book that will teach you techniques to develop high performance Scrapers and deal with cookies hidden form fields Ajax based sites and proxies You will explore a number of real world scenarios where every part of the development or product life cycle will be fully covered You will not only develop the skills to design reliable high performing data flows but also deploy your codebase to Amazon Web Services AWS If you are involved in software engineering product development or data mining or in building data driven products you will find this book useful as each recipe has a clear purpose and objective Right from extracting

data from websites to writing a sophisticated web crawler the book's independent recipes will be extremely helpful while on the job. This book covers Python libraries requests and BeautifulSoup. You will learn about crawling web spidering working with AJAX websites and paginated items. You will also understand to tackle problems such as 403 errors working with proxy scraping images and LXML. By the end of this book you will be able to scrape websites more efficiently and deploy and operate your scraper in the cloud. What you will learn: Use a variety of tools to scrape any website and data including Scrapy and Selenium. Master expression languages such as XPath and CSS and regular expressions to extract web data. Deal with scraping traps such as hidden form fields throttling pagination and different status codes. Build robust scraping pipelines with SQS and RabbitMQ. Scrape assets like image media and learn what to do when Scraper fails to run. Explore ETL techniques of building a customized crawler parser and convert structured and unstructured data from websites. Deploy and run your scraper as a service in AWS Elastic Container Service. Who this book is for: This book is ideal for Python programmers, web administrators, security professionals, and anyone who wants to perform web analytics. Familiarity with Python and basic understanding of web scraping will be useful to make the best of this book.
