The essays combine conceptual reflection on as well as empirical engagement with the topic of metaverse datafication and its political, infrastructural and social implications. Key focal points include analysis of the corporate narratives that drive the current development of metaverse platforms and technologies, the computational infrastructures and material resources that enable metaverse technologies, the reconfiguration or even subversion of state power, global markets and regulatory frameworks, the impact of metaverse practices and data on social life and personal identity and the role that these developments play for academic research and our conceptualisation of knowledge.
