AI Overview 2025:

AI Success Beyond Perfect Data Dr. M. Maruf Hossain, 2025-12-06 DESCRIPTION AI has become the cornerstone of innovation in modern enterprises. However, the common misconception that perfect data is a prerequisite often stalls initiatives. This book challenges that narrative, proving that AI success is possible even with messy, incomplete, or evolving data landscapes. The book offers a comprehensive roadmap for leveraging data science, automation, and generative AI. It begins with the principles of data science excellence, addressing how to extract value and insights from existing data. It then addresses automation, the deployment of ethical AI, and team leadership. Finally, it explores generative AI, such as its business potential, limitations, and how to balance LLMs with traditional AI techniques. Practical frameworks, real-world case studies, and success metrics are woven throughout the text. By the end of this book, readers will have a clear, actionable strategy to drive measurable AI outcomes, regardless of their current data maturity. This guide empowers leaders to drive innovation and business transformation through AI.
