Underwriting Services and the New Issues Market George J. Papaioannou, Ahmet K. Karagozoglu, 2017-07-27

Underwriting Services and the New Issues Market integrates practice theory and evidence from the global underwriting industry to present a comprehensive description and analysis of underwriting practices. After covering the regulation and mechanics of the underwriting process, it considers economic topics such as underwriting costs and compensation, the pricing of new issues, the stock price, and operating performance of issuing firms. The book also covers the evaluation of new issue decisions and an analysis of the many choices issuers face in structuring new issues. Unlike other books, it systematically develops a critical perspective about underwriting practices both in the U.S. and international markets, and with a level of detail unavailable elsewhere. It also provides an approach that reveals how financial institutions deliver underwriting services. *Underwriting Services and the New Issues Market* delivers an innovative and long overdue look at security issuance. Foreword by Frank Fabozzi. Covers underwriting contracts and arrangements on pricing and costs. Focuses on the financial consequences of the issuance decision for the firm. Describes and evaluates decisions regarding the features and structure of new security offerings.

Strategic Financial Management Casebook Rajesh Kumar, 2017-01-05

Strategic Financial Management Casebook strategically uses integrative case studies, cases that do not emphasize specific subjects such as capital budgeting or value-based management, to provide a framework for understanding strategic financial management. By featuring holistic presentations, the book puts readers into the shoes of those responsible for the world's largest wealth creators. It covers strategies of growth, mergers, and acquisitions; financial performance analysis over the past decade; wealth created in terms of stock returns since its listing in stock market; investment and financial decisions; cost of capital and corporate valuation. In addition, the casebook also discusses corporate restructuring activities undertaken by each company. Each chapter follows a template to facilitate learning, and each features an Excel-based case analysis worksheet that includes a complete data set for financial analysis and valuation. Introduces a conceptual framework for integrating strategy and finance for value creation. Emphasizes the roles of corporate governance, corporate social responsibility, and risk management in value creation. Encourages an analysis of investment financing and dividend decisions. Examines non-financial factors that contribute to value.

Return on Strategy Michael Moesgaard, Morten Froholdt, Flemming Poulfelt, 2009-12-04

Why is it that many companies meticulously following recipes on management and strategy fail? Did Google, Skype, Ryanair, Huawei, and a number of other successful companies buy into a well-thought-out strategy and adhered to that over time? How do companies deliberately opt out of the recipe game and opt into the out-of-the-box thinking fare? In short, why is it that some companies achieve a higher Return on Strategy than others? Whereas Return on Investment (RoI) has attracted increased attention over the last couple of decades, little if any attention is being paid to whether companies do at all achieve Return on Strategy (RoS) and how. This book provides an overview of contemporary strategy literature and recipes brushed up with a

view to identifying explanations as to how recipes has seldom worked as intended One out of several reasons rests on the fact that recipes do not take the so called X factor into account With the X factor as the starting point the book examines a sample of 50 global companies of which some has achieved a remarkable high Return on Strategy and others failed The 50 companies covers most continents as some are from the North America some are from the European continent and others are from different parts of the emerging Asian region threatening companies from the Western hemisphere The book explains the reason behind success and failures and provides practical tools as to how companies may increase their Return on Strategy In the toolbox you will find a framework on how to increase the Return on Strategy as well a number of dynamic positioning tools road maps and bearing points Invariably more and more companies including consultants business leaders and MBAs now work diligently in order to increase their Return on Strategy and the best of them are here to stay successfully are you

Performance. Performance of Publicly Traded Venture Capital Indices Noah Paul, 2023-10-17 Master's Thesis from the year 2021 in the subject Business economics Investment and Finance grade 8 1 10 TiasNimbis Business School course Investment Management language English abstract The purpose of this study is to examine the performance of publicly traded Venture capital indices As these indices have become available to the public in 2012 allowing investors globally to gain exposure to the Venture Capital asset class It is of note that the indices were conceived in 1996 but only became available to the public in 2012 This raises the question if these Index funds are able to provide attractive returns or even beat the market In order to answer this question archival price datasets have been extracted for VC indices various benchmark

indices and analyzed using the Sharpe ratio and Jensen's alpha. The data extracted covers a 25-year time frame from 1995 to 2021 and is extracted in both monthly and annual time intervals. Using this approach, the research finds that one of the VC indices exceeds market risk-adjusted returns in terms of the Sharpe ratio and Jensen's alpha in net and gross returns. This finding contradicts the academic theory and should not be possible. The other VC index shows significant underperformance using both measures. To conclude, it is not possible to make any general statements using the present sample. In regard to VC index performance, therefore, it is suggested that further empirical research is conducted using a larger sample of VC indices while the outperformance of the TRVCINX is also investigated as it stands in contrast to the academic literature.
