Data for the People Andreas Weigend,2017-01-31 A long time chief data scientist at Amazon shows how open data can make everyone not just corporations richer Every time we Google something Facebook someone Uber somewhere or even just turn on a light we create data that businesses collect and use to make decisions about us In many ways this has improved our lives yet we as individuals do not benefit from this wealth of data as much as we could Moreover whether it is a bank evaluating our credit worthiness an insurance company determining our risk level or a potential employer deciding whether we get a job it is likely that this data will be used against us rather than for us In Data for the People Andreas Weigend draws on his years as a consultant for commerce education healthcare travel and finance companies to outline how Big Data can work better for all of us As of today how much we benefit from Big Data depends on how closely the interests of big companies align with our own Too often outdated standards of control and privacy force us into unfair contracts with data companies but it doesn't have to be this way Weigend makes a powerful argument that we need to take control of how our data is used to actually make it work for us Only then can we the people get back more from Big Data than we give it Big Data is here to stay Now is the time to find out how we can be empowered by it *Marketing Research* Steve
