Gartner Magic Quadrant Application Security Testing:

Proceedings of International Conference on Smart Computing and Cyber Security Prasant Kumar Pattnaik, Mangal Sain, Ahmed A. Al-Absi, Pardeep Kumar, 2020-11-27 This book presents high quality research papers presented at the International Conference on Smart Computing and Cyber Security Strategic Foresight Security Challenges and Innovation SMARTCYBER 2020 held during July 7 8 2020 in the Department of Smart Computing Kyungdong University Global Campus South Korea The book includes selected works from academics and industrial experts in the field of computer science information technology and electronics and telecommunication The content addresses challenges of cyber security

Advanced Solutions in Diagnostics and Fault Tolerant Control Jan M. Kościelny, Michał Syfert, Anna Sztzyber, 2017-07-28 This book highlights the latest achievements concerning the theory methods and practice of fault diagnostics fault tolerant systems and cyber safety When considering the diagnostics of industrial processes and systems increasingly important safety issues cannot be ignored In this context diagnostics plays a crucial role as a primary measure of the improvement of the overall system safety integrity level Obtaining the desired diagnostic coverage or providing an appropriate level of inviolability of the integrity of a system is now practically inconceivable without the use of fault detection and isolation methods Given the breadth and depth of its coverage the book will be of interest to researchers faced with the challenge of designing technical and medical diagnosis systems as well as junior researchers and students in the fields of automatic control robotics computer science and artificial intelligence

Information Security and Privacy Research Dimitris Gritzalis, Steven Furnell, Marianthi Theoharidou, 2012-06-06 This book constitutes the refereed proceedings of the 27th IFIP TC 11 International Information Security Conference SEC 2012 held in Heraklion Crete Greece in June 2012 The 42 revised full papers presented together with 11 short papers were carefully reviewed and selected from 167 submissions The papers are organized in topical sections on attacks and malicious code security architectures system security access control database security privacy attitudes and properties social networks and social engineering applied cryptography anonymity and trust usable security security and trust models security economics and authentication and delegation
