How to Be Human in the Digital Economy Nicholas Agar,2019-03-12 An argument in favor of finding a place for humans and humanness in the future digital economy In the digital economy accountants baristas and cashiers can be automated out of employment so can surgeons airline pilots and cab drivers Machines will be able to do these jobs more efficiently accurately and inexpensively But Nicholas Agar warns in this provocative book these developments could result in a radically disempowered humanity The digital revolution has brought us new gadgets and new things to do with them The digital revolution also brings the digital economy with machines capable of doing humans jobs Agar explains that developments in artificial intelligence enable computers to take over not just routine tasks but also the kind of mind work that previously relied on human intellect and that this threatens human agency The solution Agar argues is a hybrid social digital economy The key value of the digital economy is efficiency The key value of the social economy is humanness A social economy would be centered on connections between human minds We should reject some digital automation because machines will always be poor substitutes for humans in roles that involve direct contact with other humans A machine can count out pills and pour out coffee but we want our nurses and baristas to have minds like ours In a hybrid social digital economy people do the jobs for which feelings matter and machines take on data intensive work But humans will have to insist on their relevance in a digital age
