J.F. ter Laak,Peter G. Heymans,Andrei I. Podol'skij,2013-03-09 Behavioral and cognitive development is considered here as

an ordered change in an individual throughout his or her lifespan and not as sets of individual differences between persons

nor as stage like progressions The concept of developmental task is introduced stressing contexts within which individuals

meet eliciting transitions in their behavior and by implication in the self The developmental task concept is compatible with

the activity theory of Gal perin especially the concept of meaningful learning The authors show how their concept may be

applied to age related crises the acquisition of a moral status the achievement of educational independence the assessment

of readiness for school acquisition of peer status acquisition of concepts of morality and the task of ageing For professional

psychologists and educationalists and advanced research students in the same subjects Client Education Mary
