Digital Video Processing 2nd Edition Prentice Hall Signal:

Digital Video Processing A. Murat Tekalp, 2015-06-06 Over the years thousands of engineering students and professionals relied on Digital Video Processing as the definitive in depth guide to digital image and video processing technology Now Dr A Murat Tekalp has completely revamped the first edition to reflect today s technologies techniques algorithms and trends Digital Video Processing Second Edition reflects important advances in image processing computer vision and video compression including new applications such as digital cinema ultra high resolution video and 3D video This edition offers rigorous comprehensive balanced and quantitative coverage of image filtering motion estimation tracking segmentation video filtering and compression Now organized and presented as a true tutorial it contains updated problem sets and new MATLAB projects in every chapter Coverage includes Multi dimensional signals systems transforms sampling and lattice conversion Digital images and video human vision analog digital video and video quality Image filtering gradient estimation edge detection scaling multi resolution representations enhancement de noising and restoration Motion estimation image formation motion models differential matching optimization and transform domain methods and 3D motion and shape estimation Video segmentation color and motion segmentation change detection shot boundary detection video matting video tracking and performance evaluation Multi frame filtering motion compensated filtering multi frame standards conversion multi frame noise filtering restoration and super resolution Image compression lossless compression JPEG wavelets and JPEG2000 Video compression early standards ITU T H 264 MPEG 4 AVC HEVC Scalable Video Compression and stereo multi view approaches

Multidimensional Signal, Image, and Video Processing and Coding John W. Woods, 2011-06-17 This fully revised and expanded edition gives readers the necessary understanding of image and video processing concepts to contribute to this hot technology s future advances Important new topics include introductory random processes image enhancement and analysis and the new MPEG scalable video coding standard

Digital Image Processing and Analysis Scott E Umbaugh, 2022-12-30 Digital Image Enhancement Restoration and Compression focuses on human vision based imaging application development Examples include making poor images look better the development of advanced compression algorithms special effects imaging for motion pictures and the restoration of satellite images distorted by atmospheric disturbance This book presents a unique engineering approach to the practice of digital imaging which starts by presenting a global model to help gain an understanding of the overall process followed by a breakdown and explanation of each individual topic Topics are presented as they become necessary for understanding the practical imaging model under study which provides the reader with the motivation to learn about and use the tools and methods being explored The book includes chapters on imaging systems and software the human visual system image transforms image filtering image enhancement image restoration and image compression Numerous examples including over 700 color images are used to illustrate the concepts discussed Readers can explore their own application development with any programming

language including C C MATLAB Python and R and software is provided for both the Windows C C and MATLAB environments The book can be used by the academic community in teaching and research with over 1 000 PowerPoint slides and a complete solutions manual to the over 230 included problems It can also be used for self study by those involved with application development whether they are engineers scientists or artists The new edition has been extensively updated and includes numerous problems and programming exercises that will help the reader and student develop their skills

Graph Spectral Image Processing Gene Cheung, Enrico Magli, 2021-08-16 Graph spectral image processing is the study of imaging data from a graph frequency perspective Modern image sensors capture a wide range of visual data including high spatial resolution high bit depth 2D images and videos hyperspectral images light field images and 3D point clouds The field of graph signal processing extending traditional Fourier analysis tools such as transforms and wavelets to handle data on irregular graph kernels provides new flexible computational tools to analyze and process these varied types of imaging data Recent methods combine graph signal processing ideas with deep neural network architectures for enhanced performances with robustness and smaller memory requirements The book is divided into two parts The first is centered on the fundamentals of graph signal processing theories including graph filtering graph learning and graph neural networks The second part details several imaging applications using graph signal processing tools including image and video compression 3D image compression image restoration point cloud processing image segmentation and image classification as well as the use of graph neural networks for image processing

The Essential Guide to Video Processing Alan C. Bovik, 2009-07-07 This comprehensive and state of the art approach to video processing gives engineers and students a comprehensive introduction and includes full coverage of key applications wireless video video networks video indexing and retrieval and use of video in speech processing Containing all the essential methods in video processing alongside the latest standards it is a complete resource for the professional engineer researcher and graduate student Numerous conceptual and numerical examples All the latest standards are thoroughly covered MPEG 1 MPEG 2 MPEG 4 H 264 and AVC Coverage of the latest techniques in video security Like its sister volume *The Essential Guide to Image Processing* Professor Bovik's *Essential Guide to Video Processing* provides a timely and comprehensive survey with contributions from leading researchers in the area Highly recommended for everyone with an interest in this fascinating and fast moving field Prof Bernd Girod Stanford University USA Edited by a leading person in the field who created the IEEE International Conference on Image Processing with contributions from experts in their fields Numerous conceptual and numerical examples All the latest standards are thoroughly covered MPEG 1 MPEG 2 MPEG 4 H 264 and AVC Coverage of the latest techniques in video security

Handbook of Image and Video Processing Alan C. Bovik, 2010-07-21 55% new material in the latest edition of this must have for students and practitioners of image video processing This Handbook is intended to serve as the basic reference point on image and video processing in the field in the research laboratory and in the classroom Each chapter has been

written by carefully selected distinguished experts specializing in that topic and carefully reviewed by the Editor Al Bovik ensuring that the greatest depth of understanding be communicated to the reader Coverage includes introductory intermediate and advanced topics and as such this book serves equally well as classroom textbook as reference resource Provides practicing engineers and students with a highly accessible resource for learning and using image video processing theory and algorithms Includes a new chapter on image processing education which should prove invaluable for those developing or modifying their curricula Covers the various image and video processing standards that exist and are emerging driving today s explosive industry Offers an understanding of what images are how they are modeled and gives an introduction to how they are perceived Introduces the necessary practical background to allow engineering students to acquire and process their own digital image or video data Culminates with a diverse set of applications chapters covered in sufficient depth to serve as extensible models to the reader s own potential applications About the Editor Al Bovik is the Cullen Trust for Higher Education Endowed Professor at The University of Texas at Austin where he is the Director of the Laboratory for Image and Video Engineering LIVE He has published over 400 technical articles in the general area of image and video processing and holds two U S patents Dr Bovik was Distinguished Lecturer of the IEEE Signal Processing Society 2000 received the IEEE Signal Processing Society Meritorious Service Award 1998 the IEEE Third Millennium Medal 2000 and twice was a two time Honorable Mention winner of the international Pattern Recognition Society Award He is a Fellow of the IEEE was Editor in Chief of the IEEE Transactions on Image Processing 1996 2002 has served on and continues to serve on many other professional boards and panels and was the Founding General Chairman of the IEEE International Conference on Image Processing which was held in Austin Texas in 1994 No other resource for image and video processing contains the same breadth of up to date coverage Each chapter written by one or several of the top experts working in that area Includes all essential mathematics techniques and algorithms for every type of image and video processing used by electrical engineers computer scientists internet developers bioengineers and scientists in various image intensive disciplines
