There is rapid development and change in the field of computer science today These affect all areas of life Emerging topics in computer science are covered in this book In the first chapter a specific IoT application called a smart mailbox with face recognition which uses cellular connectivity and image processing to securely deliver valuable documents The prototype for this system includes a fingerprint reader camera electromagnetic lock and various other components connected to an Arduino Uno and a Raspberry Pi and uses OpenCV and Python software for face detection and recognition In the second chapter authors compares and evaluates the main characteristics of 5G channels and the performance of two channel coding candidates low density parity check LDPC codes and polar codes The analysis considers block error rate bit error rate computational complexity and flexibility and finds that polar codes outperform LDPC code systems though LDPC is still a viable option compared to other code systems The third chapter focuses on how to reliably process and store DNA sequences in EHR systems without any modifications To achieve this the authors introduce a coding technique and evaluate its effectiveness using the Hamming code and Reed Solomon coding schemes on a sample data set The results show that the Reed Solomon coding scheme outperforms the Hamming code in terms of error detection and correction for securely processing DNA records to EHR systems The next chapter investigates the robustness of AI models trained on thyroid ultrasound images using different convolutional neural network CNN architectures VGG19 Xception ResNet50V2 and EfficientNetB2 against adversarial attacks using the fast gradient sign method FGSM basic iterative method BIM and projected gradient descent PGD techniques In the fifth chapter it was questioned whether artificial intelligence could write an academic article In this direction an academic article was created and evaluated by OpenAI ChatGPT The final chapter proposes an application to measure RF signal intensities in urban areas and use that information to estimate the amount of energy that can be harvested from these signals This information is then presented to users through a geographical information system

The Tao of Fundraising
John Kim, 2026-03-17

A masterclass in persuasion, performance, and psychology. The Tao of Fundraising reveals how to navigate the invisible forces of human nature and capital flow to transform great ideas into fully funded ventures. The Tao of Fundraising delivers a blunt but necessary truth: the best ideas often go unfunded not because they're bad but because their creators don't understand how capital flows. Fundraising is the most neglected art in modern business. Most MBA courses and coaching advice focus on what to do after a business has secured investment. The Tao of Fundraising seeks to fill that void. No one understands fundraising like John Kim, who has used these concepts to raise more than 70 billion over the course of his career. Here he lays out all the concepts that allowed him to rise to the top of the fundraising world. One part how-to, one part psychological study, and one part spiritual guide. The Tao breaks down the fundraising process and all the skills necessary to convince skeptical investors to place their money in your business. To overcome a system designed to keep money out of reach and the natural hesitancy of investors, you need the conceptual frameworks to understand how fundraising works in practice. The practical processes that allow a fundraiser to sell their investment. The psychological principles that enable a fundraiser to persuade skeptical investors to ignore their fears and trust the investment. The performance skills to close the deal. Drawing from ancient philosophy, modern psychology, economics, and decades of frontline experience, Kim reveals the deeper dynamics that drive fundraising at the highest level. This isn't just a book about money; it's a masterclass in human nature and the invisible forces that separate good ideas from funded ones.
