Music in the Westward Expansion Laura Dean, 2022-05-26 Over 400,000 people moved their families in search of a better life in the American West during the Westward Expansion. The pioneers made room for musical instruments with their guns, food, and tools while taking only the minimal necessities that would fit into modest wagons. During what seemed like an interminable, dusty journey, music was often the sole source of light and happiness for these exhausted travelers. This book examines the roles of music in the Westward Expansion and the diverse cultural landscape of the Old West, including northern Cheyenne courtship, flute makers, fiddle playing explorers, dancing fur trappers, hymn singing missionaries, frontier flutists, girls with guitars, wagon driving balladeers, poetic cowboys, singing farmers, musical miners, and preaching songsters.

Bloomberg Businessweek, 2010-04 **Nothing But Net: 10 Timeless Stock-Picking Lessons from One of Wall Street's Top Tech Analysts** Mark Mahaney, 2021-11-09 Find the winners, avoid the losers, and build a solid Tech portfolio for the long run with proven methods from legendary analyst Mark Mahaney. The Tech industry is the stock market's hottest, most profitable sector, but it can be a roller coaster ride. Companies with great ideas can end up going nowhere, and some that dominate today will be sold at fire-sale prices in five years. Sure, things can become so hot very rapidly. Nothing But Net provides the knowledge and insights you need to understand what's really hot to know, what's not, and to outperform other investors consistently and decisively. Famous for his smart, savvy, and unique approach to Tech stock investing, Mark Mahaney provides his 10 proven rules for succeeding as a long-term Tech stock investor, explaining everything he's learned during almost 25 years of analyzing internet stocks, including why revenue growth and customer metrics, not earnings, are what matter most to Tech investors. How to invest, not trade, in the great growth opportunities that lie ahead. How to determine when high valuations are a warning sign and when they signal an opportunity. I've watched the rise of some of the leading companies of today: Facebook, Amazon, Netflix, Google, and the fall of some of the leading companies of yesterday: Yahoo, eBay, and AOL. Mahaney writes, "Figuring out which companies really are going to be dominant franchises is an extremely hard thing to do. But those who accomplished this were arguably able to generate some of the best portfolio returns in the stock market over the past generation. Nothing But Net provides powerful advice for the next two decades: lessons you can start applying today and use for years to come."
