Project Quality Sami Zaki Moussa (d),1997 **Child Labour and School Enrolment** Horst Friedrich

Rolly,2019-08-16 This book reflects the outcome of a long term involvement in issues of child labour non formal education and formal school enrolment. It documents research findings and practical experiences on social economic and cultural causes of child labour and various pragmatic and theory guided methods as well as legal instruments to combat child labour. The tenet that quality schooling prevents child labour implies a shift in child labour monitoring from a conventional controlling approach at workplaces to a community based enabling approach at schools. Child labour and school enrolment are not isolated phenomena that can be strategically resolved under controlled conditions in the human lifeworld but are rather positioned, reflected and acted upon in the context of a handed down and existing system. Universal human rights instruments including educational rights offer directives to resolve problematic settings that prevailed over time however they require an unequivocal commitment which is not always the case in the ground reality of pluralistic stakeholders divided by conflicting group interests.

Regional Queen Conch Fisheries Management and Conservation Plan Food and Agriculture Organization of the United Nations,2017-01-01 The overall objective of this 10 year Regional Queen Conch Fishery Management and Conservation Plan is to guide the implementation of a set of identified management measures that can be applied at the regional or sub regional level for the sustainability of queen conch populations and for the maintenance of a healthy fishery and livelihood of the people involved in the fishery. The ecosystem approach forms the basis of this Regional Queen Conch Fishery Management and Conservation Plan enhancing partnerships and collaboration throughout the Wider Caribbean region to improve the long term governance of queen conch fisheries across the Caribbean. The Regional Queen Conch Fishery Management and Conservation Plan was formulated with the following specific objectives: 1 To improve the collection and integration of scientific data needed to determine the overall queen conch population status as the basis for the application of ecosystem based management 2 To harmonize measures aimed at increasing the stability of the queen conch population and to implement best management practices for a sustainable fishery 3 To increase coordination and collaboration toward achieving better education and outreach monitoring and research co management and strengthening optimizing and harmonizing regional governance arrangements 4 To adopt regional management measures which incorporate the precautionary approach.
