The current edition has undergone a major revision to include seven new chapters. The chapter on the compression ignition engine has been expanded to form three chapters concentrating on aspects such as common rail injection, recently developed distributor type pumps and electronic control of injection. Automatic, semi-automatic and continuously variable ratio transmissions are covered in two new chapters. A third contains information on the latest developments in computer aided control over both braking and traction for improving vehicle stability while another contains entirely new information on the practice and principles of electrically actuated power assisted steering. Also included is coverage of material detailing the latest knowledge and practice relating to safety systems, vehicle integrity, braking systems and much more.
