The Circassians of Turkey Caner Yelbasi, 2019-08-22 Turkey's Circassians were exiled to the Ottoman Empire in the wake of the Russian conquest of the Caucasus in 1864 resettling most notably in the Danubian provinces Thessaly Syria Central Anatolia and the southern shores of the Sea of Marmara As experienced veterans of the wars with Russia many Circassians were recruited into the paramilitary groups of the late Ottoman Empire and later fought on both sides in the Turkish Civil War Here Caner Yelbasi reveals the complex and important role played by the Circassians of north western Anatolia in the chaotic years after 1918 Because many of the key Circassian actors either sided initially with The Ottoman Government or later broke away from the national movement led by Mustafa Kemal in Ankara official Turkish historiography frequently labelled them traitors to the nation This book revises this narrative by revealing the overlapping and sometimes conflicting bonds of kinship and political loyalty that inscribed their

presence in heartlands of the empire and the republic Yelbasi shows that the Circassians played an important role in the establishment of the early republic and how the Turkification policies of the Kemalist regime in the two decades following 1918 disrupted their world Using a wide variety of primary source material including Ottoman and Republican archives as well as memoirs the press and secondary literature this book sheds light on a minority who unlike the Kurds or Armenians are yet to receive scholarly attention in Turkish Studies It will thus be a vital resource for scholars in Middle East Studies Turkish Studies and Ottoman Studies *National Contract Management Journal*, 1982 *Printers' Ink; the ... Clearcutting the Pacific Rain Forest Richard A. Rajala, 2011-11-01 This book integrates class environmental and political analysis to uncover the history of clearcutting in the Douglas fir forests of B C Washington and Oregon between 1880 and 1965 Part I focuses on the mode of production analyzing the technological and managerial structures of worker and resource exploitation from the perspective of current trends in labour process research Rajala argues that operators sought to neutralize the variable forest environment by emulating the factory model of work organization The introduction of steam powered overhead logging methods provided industry with a rudimentary factory regime by 1930 accompanied by productivity gains and diminished workplace autonomy for loggers After a Depression inspired turn to selective logging with caterpillar tractors timber capital continued its refinement of clearcutting technologies in the post war period achieving complete mechanization of yarding with the automatic grapple Driviiing this process of innovation was a concept of industrial efficiency that responded to changing environmental conditions product and labour markets but sought to advance operators class interests by routinizing production The managerial component of the factory regime took shape in accordance with the principles of the early 20th century scientific management movement Requiring expertise in the organization of an expanded technologically sophisticated exploitation process operators presided over the establishment of logging engineering programs in the region s universities Graduates introduced rational planning procedures to coastal logging contributing to a rate of deforestation that generated a corporate call for technical forestry expertise after 1930 Industrial foresters then

emerged from the universities to provide firms with data needed for long range investment decisions in land acquisition and management Part II constitutes an environmental and political history of clearcutting This reconstructs the process of scientific research concerning the factory regime s impact on the ecology of the Douglas fir forest assessing how knowledge was utilized in the regulation of cutting practices Analysis of business government relations in British Columbia Washington and Oregon suggests that the reliance of those client states on revenues generated by timber capital encouraged a pattern of regulation that served corporate rather than social and ecological ends
