Reading at a Crossroads? Rand J. Spiro, Michael DeSchryver, Michelle Schira Hagerman, Paul M. Morsink, Penny Thompson, 2015-03-05 The Internet is transforming the experience of reading and learning through reading. Is this transformation effecting a radical change in reading processes as readers synthesize understandings from fragments across multiple texts? Or conversely is the Internet merely a new place to use the same reading skills and processes developed through experience with traditional print-based media? Are the changes in reading processes a matter of degree or are they fundamentally new? And if so, how must reading theory, research, and instruction adjust? This volume brings together distinguished experts from the fields of reading research, teacher education, educational psychology, cognitive science, rhetoric, and composition, digital humanities, and educational technology to address these questions. Every question is not answered in every chapter. How could they be? But every contributor has many thoughtful things to say about a subset of these important questions. Together, they add up to a comprehensive response to the issues the field faces as it approaches what may well be or not a crossroads. A website devoted to extending discussion around the book in creative and disjunctive ways, readingatacrossroads.net, moves it beyond the printed page.
