The first part provides introductory considerations from a historical, technical, socio-scientific, legal, and ethical perspective. Complementing this, the second part illustrates these topics using various applications in the field of biomedical engineering. These cannot be covered exhaustively, but a broad overview is provided, and the relevant challenges are addressed. Finally, the last part deals with questions relating to the framework conditions, the regulation of AI, and the associated business models. Last but not least, brief introductory statements from the Federal Ministry of Research, Technology, and Space and the DGBMT on the topic of AI in biotechnology and healthcare underscore the relevance of the contributions.
