Contemporary Human Geography

Roderick P. Neumann, Patricia L. Price, 2019-01-10. With each chapter organized by five themes: region, mobility, globalization, nature, culture, cultural landscape. Contemporary Human Geography introduces students to geography concepts through fascinating topics such as the distribution of college sports, the relationship of beauty pageants and cultural identity, texting and language modification, and more, continually reinforcing geographers' contributions to our understanding of how we live in a globalized modern world. The authors frame this coverage using specific learning objectives to help students focus on essential concepts and prepare for class discussions, assignments, and exams. Contemporary Human Geography comes with two of Macmillan's online course spaces, allowing instructors to choose how much media and assessment they'd like to make available for their students and at what price point. SaplingPlus offers innovative media content, curated assessments, and brand new mapping activities powered by Esri. Achieve Read Practice combines the accessibility of a VitalSource e-book with our self-paced formative quizzing engine LearningCurve.

Travel & Leisure, 2009. [Knocking on Heaven's Door](#) Lisa Randall, 2011-09-20. A highly readable, accessible look at particle physics today and a passionate defense and celebration of the scientific worldview. Discovery News, One of Time magazine's 100 most influential people in the world, and the bestselling author of *Warped Passages*. Lisa Randall is an expert in both particle physics, the study of the smallest objects we know of, and cosmology, the study of the largest. In this book, Randall takes us on an amazing tour through the latest developments in physics, including a new preface explaining the thrilling discovery of the Higgs boson and the theoretical concepts underlying this work. *Knocking on Heaven's Door* also explores the role of risk, creativity, uncertainty, beauty, and truth in scientific thinking. Through provocative conversations with leading figures in other fields, including chef David Chang, forecaster Nate Silver, and screenwriter Scott Derrickson, and through reflections on her own work, Randall makes an impassioned argument in defense of science. Praise for *Knocking on Heaven's Door*: Randall is one of the more original theorists at work in the profession today. She gives a fine analysis of the affinity between scientific and artistic beauty, comparing the broken symmetries of a Richard Serra sculpture to those at the core of the Standard Model. *New York Times Book Review* 100 Notable Books of 2011. Written with dry wit and ice-cool clarity, *Knocking on Heaven's Door* is a book that anyone at all interested in science must read. This is surely the science book of the year. *Sunday Times London*. Valuable and engaging. Randall's generous cornucopia of ideas, her engaging style, and above all, her deep excitement about physics, make this a book
