*Mood Machine* Liz Pelly, 2025-11-04 NATIONAL BESTSELLER An unsparing investigation into Spotify's origins and influence on music weaving unprecedented reporting with incisive cultural criticism illuminating how streaming is reshaping music for listeners and artists alike Drawing on over one hundred interviews with industry insiders former Spotify employees and musicians *Mood Machine* takes us to the inner workings of today's highly consolidated record business showing what has changed as music has become increasingly playlisted personalized and autoplayed Building on her years of wide ranging reporting on streaming music journalist Liz Pelly details the consequences of the Spotify model by examining both sides of what the company calls its two sided marketplace the listeners who pay with their dollars and data and the musicians who provide the material powering it all The music business is notoriously opaque but here Pelly lifts the veil on major stories like streaming services filling popular playlists with low cost stock music and the rise of new payola like practices For all of the inequities exacerbated by streaming Pelly also finds hope in chronicling the artist led fight for better models pointing toward what must be done collectively to revalue music and create sustainable systems A timely exploration of a company that has become synonymous with music *Mood Machine* will change the way you think about and listen to music

world's music genres. Reviews: If you want to know anything about how music surfaces today, how to find it or how to create it, you will find what you need right here. And you will be highly entertained and amused in the process. Joseph Menn, Washington Post staff writer and author of *All the Rage: The Rise and Fall of Shawn Fanning's Napster*. We used to sell CDs by the weight of pallets; thanks to streaming, we know how our content is consumed. In this immersive book, Glenn has demonstrated what we can do with this knowledge so other industries facing their Napster Moment can learn from his unrivalled first-mover advantage. Will Page, author of *Pivot* and former Chief Economist of Spotify. I'd say that reading this book is the next best thing to having an in-depth, impassioned, hours-long fika with Glenn McDonald about music and culture and all of the most burning topics of our time, but I'd be lying. It's even better. This book is a true behind-the-scenes examination of our culture and our industry from the perspective of someone who was in the thick of it from the beginning. It's a history of the streaming era written by someone who made history in the streaming era. Meg Tarquinio, PhD, Spotify Twitch Netzwerk Music Group. Throughout McDonald's book, personal anecdotes and his own love of music spill out in witty conversational prose. Even chapters that delve into streaming's complex finances, unsurprisingly, your 15 monthly fee does not go directly to your favourite artist but is split between that month's most-streamed, meaning that megastars such as Swift and Ed Sheeran stay at the top of the pyramid, are told in layman's terms. Poppie Platt, *The Daily Telegraph*. Extract: CHAPTER 9: MERCENARIES AND FAN ARMIES. Where there's an economic system, there's probably fraud. This is not a proud truth to admit about humanity, but it seems to me to have been consistently historically true. Money is supposed to be a bookkeeping mechanism, but it becomes a goal. Fraud and cheating existed in the music business like any business long before streaming happened. Back when charts were based on people reporting sales numbers on phone calls, those people could be bribed to say different numbers. Radio DJs could be paid to pretend they were playing a song more because they just liked it. Accounting could be manipulated. Streaming doesn't necessarily make cheating easier overall, but it definitely makes it more accessible to introverts. Instead of making phone calls, you can write computer programs that pretend to be streaming music listeners. Piracy maintains a certain dastardly allure. Streaming music fraud is not to be brutally honest, the most glamorous or profitable form of dastradry. Streaming rewards accumulate in tiny micro-transactions, and the software necessary to laboriously accumulate micro-royalties illegitimately isn't any easier to write than legal software for which you can get paid normal salaries. It only really scales if you become a service provider selling fraud as a service, and then you're a business with business problems instead of a pirate with a rakish eye patch and the sea air in your hair. If you want to cheat your way to riches, you're better off trying to do it in junk stocks or cryptocurrencies where there's way too much money sloshing around and the distinction between legitimate behavior and cheating is fuzzy. So you might have thought that fraud wouldn't be a big issue in streaming. Buy the book and carry on reading.
