Planetary Systems Raymond T. Pierrehumbert, 2021-12-09 Not long ago the Solar System was the only example of a planetary system a star and the bodies orbiting it that we knew Now we know thousands of planetary systems and have even been able to observe planetary systems at the moment of their birth This Very Short Introduction explores this new frontier incorporating the latest research The book takes the reader on a journey through the grand sweep of time from the moment galaxies begin to form after the Big Bang to trillions of years in the future when the Universe will be a dilute soup of dim galaxies populated mostly by red dwarf stars Throughout Raymond T Pierrehumbert introduces the latest insights gained from a new generation of telescopes that catch planetary systems at the moment of formation and to the theoretical advances that attempt to make sense of these observations He explains how the elements that make up life and the planets on which life can live are forged in the interiors of dying stars and make their way into rocky planets He also explores the vast array of newly discovered planets orbiting stars other than our own and explains the factors that determine their climates Finally he reveals what determines how long planetary systems can live and what happens in their end times Very Short Introductions Brilliant Sharp Inspiring ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

explore the proposition that as a society we are becoming amoral our professions no longer have a moral dimension Wide ranging it looks at for example the ethics of forestry and planetary engineering Current Opinion ,1909 **Current Literature** Edward Jewitt Wheeler, Frank Crane, 1909 The Annual American Catalogue ,1891 *Evolution of Planetary Atmospheres and Climatology of the Earth* ,1979 **Symons's Monthly Meteorological Magazine** George James Symons, Herbert Sowerby Wallis, Hugh Robert Mill, 1913 **Symons's Monthly Meteorological Magazine** ,1913 **Principles of Nature** Maria M.
