Security and Privacy in Communication Networks Noseong Park, Kun Sun, Sara Foresti, Kevin Butler, Nitesh Saxena, 2020-12-11 This two volume set LNCS 335 and 336 constitutes the post conference proceedings of the 16th International Conference on Security and Privacy in Communication Networks SecureComm 2020 held in Washington DC USA in October 2020. The conference was held virtually due to COVID 19 pandemic. The 60 full papers were carefully reviewed and selected from 120 submissions. The papers focus on the latest scientific research results in security and privacy in wired mobile hybrid and ad hoc networks in IoT technologies in cyber physical systems in next generation communication systems in web and systems security and in pervasive and ubiquitous computing.

Global Engineering Ethics Heinz Luegenbiehl, Rockwell Clancy, 2017-07-07 Global Engineering Ethics introduces the fundamentals of ethics in a context specific to engineering without privileging any one national or cultural conception of ethics. Numerous case studies from around the world help the reader to see clearly the relevance of design safety and professionalism to engineers. Engineering increasingly takes place in global contexts with industrial and research teams operating across national and cultural borders. This adds a layer of complexity to already challenging ethical issues. This book is essential reading for anyone wanting to understand or communicate the ethics of engineering including students, academics and researchers and is indispensable for those involved in international and cross cultural environments. Takes a global values approach to engineering ethics rather than prioritizing any one national or regional culture. Uses engineering case studies to explain ethical issues and principles in relatable practical contexts. Approaches engineering from a business perspective emphasizing the extent to which engineering occurs in terms of profit driven markets addressing potential conflicts that arise as a result. Provides extensive guidance on how to carry out ethical analysis by using case studies to practice addressing and thinking through issues before confronting them in the world.
