These are the notes for the first lecture, *Foundations of Cooling Theory*. These are generalised and give insights on problems for all of the cooling games. Some are generalised, while some are specific to the lecture, the latter contribution to Cooling Theory and the book of Hoffman and Pines (*Foundations of Game-Theoretic Games*). I also used several other sources for historical, historical topics in Part II (some given in *Foundations of Cooling Theory* and *Game-Theoretic Games* by Hoffman and Pines) and some other sources in *Foundations of Game-Theoretic Games* (some given in *Foundations of Game-Theoretic Games*). I also included some historical notes in the *Foundations of Game-Theoretic Games* (some given in *Foundations of Game-Theoretic Games*). The last section of the notes is based on *Game-Theoretic Games* (some given in *Foundations of Game-Theoretic Games*).

All credits go to those who wrote the book.
