**Davis Smart Business for the New Economy** ,2001      **Clean Winners** Goutam Challagalla, Frederic Dalsace, 2026-03-24 Despite massive investments sustainable business still isn't very profitable for most companies Here's a fresh approach for resetting sustainability for customer value and profitability Store aisles packed with products labeled environmentally friendly Businesses scrambling to respond to stakeholder demands that they make their operations sustainable Ads touting green credentials for all kinds of enterprises For a long time now this has been the market landscape we've lived in with companies such as Unilever leading the way and creating pressure for others to follow suit But the uncomfortable truth is that after years of investment in sustainable products and services most companies still aren't seeing the payoff not financially not in value for customers and not in real environmental and social impact Why not As IMD professors Goutam Challagalla and Frederic Dalsace show in this eye-opening and practical book the shortfall is due to a strategic misalignment and a misunderstanding of what actually drives customers purchase decisions The authors flip conventional sustainability strategy on its head instead of companies asking How can we make our offerings more sustainable they should be asking How can we use sustainability as a catalyst to improve the performance of our products make them more affordable or both Viewed this way sustainability is an intrinsic value-generating element of an offering rather than a costly add-on The authors call companies that understand this insight John Deere Michelin Schneider Electric Nespresso Reckitt and others clean

winners or Resonators With wide ranging and instructive stories they show how Resonators use sustainability to increase customer value and generate robust profits Offering practical frameworks tools and tactics Clean Winners is your essential guide to reimagining your sustainability strategy
