Data Science Live Book Pablo Casas,2018-03-16 Welcome It s a book to learn data science machine learning and data analysis with tons of examples and explanations around several topics like Exploratory data analysis Data preparation Selecting best variables Model performance Note This is the Black among others using easy copy paste pieces of code Please note that this is not a book to learn how to program R from scratch nor how algorithms are implemented math and stats area Who is the target audience It s aimed to people who are Programmers and data scientists who work or want to in machine learning projects However the ones who don t want or don t know how to code can get some useful insights which can add value as data project analysts All the R examples are well explained in code comments No math or statistical background to understand it The book tries to be as tool independent as possible For example the decision of what to do to deal with missing or extreme values is the whether we choose R Python Julia What it changes is the how Last wordsTo develop a critical thinking without taking any statement as the true truth it s essential in this sea of books courses videos and any technical material to learn This book is just another view in the data science perspective Hope you like it Index Exploratory data analysis Profiling The voice of the numbers Correlation and Relationship Data preparation Handling Data Types High Cardinality Variable in Descriptive Stats High Cardinality Variable in Predictive Modeling Treatment of outliers Missing Data Analysis Handling and Imputation of Considerations involving time Selecting best variables General Aspects in Selecting Best Variables Intuition The best selection The nature of the selection Improving variables Cleaning by domain knowledge Variables work in groups Correlation between input variables Keep it simple Variable selection in Clustering Selecting the best variables in practice Target profiling Assesing Model performance Knowing the Error Out of Time Validation Gain and Lift Analysis Scoring Data Appendix The magic of percentiles funModeling quick start Drug Development Supported by Informatics Hiroko Satoh,Kimito Funatsu,Hiroshi Yamamoto,2024-10-18 This book describes the state of the art of chemoinformatics bioinformatics materials informatics and measurement metrology informatics to develop drugs with desired activity or physicochemical properties and to optimize the functionality efficacy safety and quality of the compounds for drugs Recently AI drug discovery drug discovery research utilizing artificial intelligence technology such as machine learning has attracted much attention This book provides an overview of the four applied informatics fields and their applications in drug development for a wide spectrum of readers from learners to professional scientists in academia and industry It focuses on the basic research stage of drug development with contributions from experts at the forefront of these fields The authors hope that this book will be of assistance to explore new opportunities for collaboration between pharmaceutical science and informatics **Data Science in Chemistry** Thorsten Gressling,2020-11-23 The ever growing wealth of information has led to the emergence of a fourth paradigm of science This new field of activity data science includes computer science mathematics and a given specialist domain This book focuses on chemistry explaining how to use

data science for deep insights and take chemical research and engineering to the next level It covers modern aspects like Big Data Artificial Intelligence and Quantum computing

Knowledge is Power in Four Dimensions: Models to Forecast Future Paradigm Bahman Zohuri, Farhang Mossavar Rahmani, Farahnaz Behgounia, 2022-07-14 Knowledge is Power in Four Dimensions Models to Forecast Future Paradigms Forecasting Energy for Tomorrow s World with Mathematical Modeling and Python Programming Driven Artificial Intelligence delivers knowledge on key infrastructure topics in both AI technology and energy Sections lay the groundwork for tomorrow s computing functionality starting with how to build a Business Resilience System BRS data warehousing data management and fuzzy logic Subsequent chapters dive into the impact of energy on economic development and the environment and mathematical modeling including energy forecasting and engineering statistics Energy examples are included for application and learning opportunities A final section deliver the most advanced content on artificial intelligence with the integration of machine learning and deep learning as a tool to forecast and make energy predictions The reference covers many introductory programming tools such as Python Scikit TensorFlow and Kera Helps users gain fundamental knowledge in technology infrastructure including AI machine learning and fuzzy logic Compartmentalizes data knowledge into near term and long term forecasting models with examples involving both renewable and non renewable energy outcomes Advances climate resiliency and helps readers build a business resiliency system for assets
