web the refractive index tells you the speed of light in a given material it is defined as  $n = c/v$  where  $c$  is speed of light in vacuum and  $v$  is velocity of light in the material the refractive index is used in not defined by snell's law which relates the angle of incidence to the angle of refraction when light passes from one material into

refraction wikipedia - Dec 24 2022

web for light refraction follows snell's law which states that for a given pair of media the ratio of the sines of the angle of incidence and angle of refraction is equal to the ratio of phase velocities in the two media or equivalently to the refractive indices of the two media

refraction of light statpearls ncbi bookshelf - Dec 12 2021

web jul 17 2023 when rays of light strike a spherical surface separating two transparent media with different refraction indices the light rays will be refracted in the same plane per the law of refraction the amount of refraction will depend on the angle of incidence and dioptric power of the spherical surface
