*The Sea Grant International Program* Todd D. Ebitz, Thomas E. Murray, 1984      **A Community Enterprise** Malcolm Tull, 2017-10-18 This volume concerns the history of the Australian port of Fremantle located on the edge of Western Australia and the Indian Ocean throughout the hundred years of frequent changes to its structure and function between 1897 and 1997 Tull's aim is to use Fremantle as a prime example of the complex network of a Port as a community and a place of vast and varied maritime business endeavours He seeks to erase the perception of ports as passive links in the international transport chain in order to draw ports to the attention and further research of maritime historians The chapters are arranged thematically rather than chronologically and includes statistical appendices a bibliography and an index for ease of navigation      *Proceedings of the International Conference on Geosynthetics and Environmental Engineering* Han-Yong Jeon, 2023-10-02 This book presents selected papers from the Proceedings of the International Conference on Geosynthetics and Environmental Engineering ICGEE 2023 held in Jeju Island South Korea covering topic areas in geosynthetic applications and sustainability civil and structural engineering and environmental engineering and science The published articles cover the latest research studies with the focus of discussing the relationship between geotechnical materials and environmental engineering in depth to solve complex geosynthetic issues in civil and environmental engineering It also highlights state of the art technologies adopted by the relevant industries which are not only commercially viable but also environmentally sustainable The content of the papers appeals to researchers and industrial practitioners working in the field of geoengineering      *Dock and Harbour Engineering* Henry F. reefs as an integrated part of a multi defence line strategy for tsunami attenuation In her study she first discusses the results of laboratory experiments in order to identify the difference in the nonlinear interaction of storm and tsunami like solitary waves with an impermeable sub merged structure of a finite width including generation of wave breaking and wave fission With this basic knowledge the damping performance of an artificial reef under tsunami impact is determined as a ratio of wave transmission wave reflection and wave energy dissipation for varying reef geometries and incident wave conditions using a Boussinesq type numerical model *The Engineering Digest* Harwood Frost, Charles MacCaughey Sames, 1907
