academicians environmentalists climate change scientists industrialists and policymakers It may also serve as additional reading material for undergraduate and graduate students of environmental sciences artificial intelligence and modeling etc

Postphenomenology and Technologies within Educational Settings Markus Bohlmann, Patrizia Breil, 2024-12-20

This volume explores the human technology relations that both shape modern educational settings and have a decisive influence on what education is and will be in the future The contributors present empirical evidence to challenge and reframe the goal of education in relation to technology *Reframing Transitional Justice* Mark A. Drumbl, Kirsten J.

Fisher, 2026-04-20 This book challenges the simplicity predestination and self evident nature of contemporary narratives of transitional justice Transitional justice is the field of study that examines how states should reckon with massive human rights abuses The book upends these assumptive narratives on three crucial fronts The first front is that of innovations Here the book questions the ability of transitional justice to deliver tangible successes in an era of rapid and overwhelming technological change and contestation over what constitutes human memory communicative dialogue and reliable evidence The second front involves boundaries Here the book confronts the professed superpower of transitional justice to do more and more in an endless concatenation of additives While there is cause for optimism this book also suggests that transitional justice remains awkward in how it copes with the existential pressures of environmental health and cultural crises On its third front refractions this book identifies how transitional justice addresses racism misogyny and democratic backsliding How the prism of transitional justice interventions refracts these scourges remains inadequate Throughout the book asks readers to imagine where the field and practice of transitional justice could go from here what new innovations are required what boundaries must be stretched or retrenched and what perspectives need to be considered due to new ways of seeing current and past atrocities Accordingly this book will be of considerable interest to academics practitioners working on post conflict reconstruction and students at all levels ranging from undergraduate to post doctoral in the areas of law politics cultural property criminology human rights international relations and technology studies

Medical Editing Barbara

Gastel, 2025-12-22 From an award winning instructor of medical editing this is the first guide designed to introduce the field to prospective and early career medical editors Medical editing is a thriving and wide ranging specialty within the editorial profession Its practitioners occupy a unique ecosystem that involves its own style manuals and the ability to work with highly technical medical terminology and issues and its work helps ensure that health practitioners researchers and the public receive sound understandable medical information Today opportunities abound for medical editors who come from many backgrounds and work in many settings such as medical journals medical institutions and the freelance realm Written by an experienced and award winning editor *Medical Editing A Guide to Learning the Craft and Building Your Career* provides a thorough introduction to the profession At levels ranging from the punctuation mark to the publication Barbara Gastel provides accessible and concrete instruction in editing medical writing Distinctively the book also explores ethical issues
