**Killing Marketing: How Innovative Businesses Are Turning Marketing Cost Into Profit** Joe Pulizzi, Robert Rose, 2017-09-08 Killing your current marketing structure may be the only way to save it. Two of the world's top marketing experts reveal the next level of breakthrough success: transforming your marketing strategy into a standalone profit center. What if everything we currently know about marketing is what is holding us back? Over the last two decades, we've watched the entire world change the way it buys and stays loyal to brands. But marketing departments are still operating in the same campaign-centric, product-led operation that they have been following for 75 years. The most innovative companies around the world have achieved remarkable marketing results by fundamentally changing their approach. By creating value for customers through the use of owned media and the savvy use of content, these businesses have dramatically increased customer loyalty and revenue. Some of them have even taken it to the next step and developed a marketing function that actually pays for itself. Killing Marketing explores how these companies are ending the marketing as we know it in favor of this new, exciting model. Killing Marketing provides the insight, approaches and examples you need to understand these disruptive forces in ways that turn your marketing from cost center to revenue creator. This book builds the case for literally transforming the purpose of marketing within your organization. Joe Pulizzi and Robert Rose of the Content Marketing Institute show how leading companies are able to sell the very content that propels their marketing strategy. You'll learn how to transform all or part of your marketing operation into a media company. Integrate this new operation into traditional marketing efforts. Develop best practices for attracting and retaining audiences. Build a strategy for competing against traditional media companies. Create a paid-earned media strategy fueled by an owned media strategy. Red Bull, Johnson & Johnson, Disney and Arrow Electronics have succeeded in what ten years ago would have been deemed impossible. They continue to market their products as they always have and through their content-driven and audience-building initiatives, they drive value outside the day-to-day products they sell and monetize it directly. Killing Marketing rewrites the rules of marketing, enabling you to make the kind of transition that turns average companies into industry legends.

**Creators Take Control** Edward Lee, 2023-03-28 A leading legal scholar offers a compelling new theory to explain the meteoric rise of non-fungible tokens (NFTs) and their impact on art, business, entertainment and society, and explains how they are revolutionizing our understanding of ownership. If you buy an NFT, do you own anything? Critics say no. Then why are people spending so much money to own them, to the tune of 27 billion in 2021? And why are big businesses and venture

capital firms investing hundreds of millions to develop NFTs for people's use in the metaverse a purely imaginary world In Creators Take Control Edward Lee offers a compelling new theory he calls Tokenism that answers these perplexing questions Using vivid examples Lee lucidly explains how NFTs operate and how they fundamentally change our understanding of ownership Tokenism is an artistic cultural and technological movement that creates value in a new kind of ownership of a new type of property symbolized by a virtual token through a process of technological abstraction and artificial scarcity effectuated by NFTs Ownership becomes virtual What Cubism did in radically changing the twentieth century perspective of creating and viewing art through cubes Tokenism does today in altering our perspective of owning art and other things through tokens Both movements radically reimagine what's possible Creators and businesses have seized upon this profound transformation In a short time they have developed a new market for digital art important new rights for creators innovative business models based on decentralized collaboration and a new type of interactive ownership that enables identity community and patronage through NFTs These innovations are just the start of revolutionary changes to society Lee shows how NFTs create a new form of decentralized intellectual property or De IP Comparable to the movement to decentralized finance DeFi De IP empowers creators to take control of their artistic productions and livelihood Lee's intellectual tour de force is filled with practical insights and hope for fostering creativity and a Virtual Renaissance for the ages
