

Coulomb's Law

Coulomb's Law gives the relationship between the electrostatic force present in between two charges when they are some distance apart from each other.

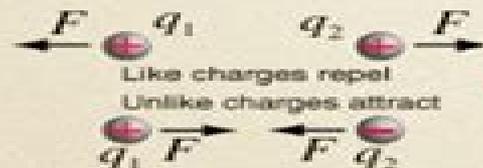

It states that " an electrostatic force is present between two charges, which is directly proportional to the product of magnitude of charges and is inversely proportional to square of the distance between them".

If "F" is the force present between two charges of magnitude "q1" and "q2" and "r" is the distance between them, then we can write it down as:

$$F = k \frac{q_1 \times q_2}{d^2}$$

where $k = \frac{1}{4\pi\epsilon_0} \approx 9 \times 10^9 \text{ N} \cdot \text{m}^2/\text{C}^2 = \text{Coulomb's constant}$

$$F = \frac{kq_1q_2}{r^2} = \frac{q_1q_2}{4\pi\epsilon_0 r^2} \quad \text{Coulomb's Law}$$

It shows that the electrostatic force will increase when magnitude of charges will increase, and electrostatic force will decrease whenever distance increases and vice versa.

Dispositions and Causes Toby Handfield,2009-02-05 In recent decades the analysis of causal relations has become a topic of central importance in analytic philosophy More recently dispositional properties have also become objects of intense study Both of these phenomena appear to be intimately related to counterfactual conditionals and other modal phenomena such as objective chance but little work has been done to directly relate them Dispositions and Causes contains ten essays by scholars working in both metaphysics and in philosophy of science examining the relation between dispositional and causal concepts Particular issues discussed include the possibility of reducing dispositions to causes and vice versa the possibility of a nominalist theory of causal powers the attempt to reduce all metaphysical necessity to dispositional properties the relationship between dispositions causes and laws of nature the role of causal capacities in explaining the success of scientific inquiry the grounding of dispositions and causes in objective chances and the type of causal power required for free agency The introductory chapter contains a detailed overview of recent work in the area providing a helpful entry to the literature for non specialists

Just in Time Teaching Scott Simkins, Mark Maier, 2023-07-03 Just in Time Teaching JiTT is a pedagogical approach that requires students to answer questions related to an upcoming class a few hours beforehand using an online course management system While the phrase just in time may evoke shades of slap dash work and cut corners JiTT pedagogy is just the opposite It helps students to view learning as a process that takes time introspection and persistence Students who experience JiTT come to class better prepared and report that it helps to focus and organize their out of class studying Their responses to JiTT questions make gaps in their learning visible to the teacher prior to class enabling him or her to address learning gaps while the material is still fresh in students minds hence the label just in time JiTT questions differ from traditional homework problems in being designed not only to build cognitive skills but also to help students confront misconceptions make connections to previous knowledge and develop metacognitive thinking practices Students consequently spend more time on course concepts and ideas but also read their textbooks in ways that result in more effective and deeper learning Starting the class with students work also dramatically changes the classroom learning environment creating greater student engagement This book demonstrates that JiTT has broad appeal across the academy Part I provides a broad overview of JiTT introducing the pedagogy and exploring various dimensions of its use without regard to discipline Part II of the book demonstrates JiTT s remarkable cross disciplinary impact with examples of applications in physics biology the geosciences economics history and the humanities Just in Time Teaching article from The Hispanic Outlook in Higher Education Reprinted with permission from Hispanic Outlook in Higher Education Magazine www.hispanicoutlook.com
