Proof of Stake Vitalik Buterin, 2022-09-27 The new book from one of TIME's 2021 most influential people. Author was in Forbes 30 Under 30 Hall of Fame. A crucial contribution to development of a new technology that will impact all of our lives. Laura Shin, host of the Unchained podcast and author of *The Cryptopians: Idealism, Greed, Lies, and the Making of the First Big Cryptocurrency Craze*. Vitalik Buterin is one of the most influential creators of our generation. Like most of his work, it is sure to become a must-read. Camila Russo, author of *The Infinite Machine*, founder of *The Defiant*. The ideas behind Ethereum, in the words of its founder, describing a radical vision for more than a digital currency: reinventing organizations, economics, and democracy itself in the age of the internet. When he was only nineteen years old, in late 2013, Vitalik Buterin published a visionary paper outlining the ideas behind what would become Ethereum. He proposed to take what Bitcoin did for currency: replace government and corporate power with power shared among users, and apply it to everyday apps, organizations, and society as a whole. Now, less than a decade later, Ethereum is the second most valuable cryptocurrency and serves as the foundation for the weird new world of NFT artworks, virtual real estate in the metaverse, and decentralized autonomous organizations. The essays in *Proof of Stake* have guided Ethereum's community of radicals and builders. Here, for the first time, they are collected from across the internet for new readers. They reveal Buterin as a lively, creative thinker, relentlessly curious and adventuresome in exploring the consequences of his invention. His writing stands in contrast to the hype that so often accompanies crypto in the public imagination. He presents it instead as a fascinating set of social, economic, and political possibilities, opening a window into a conversation that far more of us could be having. Media scholar Nathan Schneider provides introductions and notes.

[God-Given or Bust](#) Cheryl K. Chumley, 2025-01-14 In America, either rights come from God or they don't. This is the ultimate war, and *God-Given or Bust* tells how patriots can win. American exceptionalism is rooted in the idea that individual rights come from God, and government is only in place to preserve and protect those rights. But America's losing sight of that concept. America's turning into a country where the government grants rights and privileges to only those the government deems worthy, and takes them from those it deems unworthy. This is not how the Founding Fathers envisioned the nation; this is not how the concept of inalienable rights, coming from a Creator, works. Rather, this is how Marxism, communism, and collectivism spread. If we want a nation that's free for generations to come, then we must reclaim the notion of God-given and ditch the idea of government-granted. The only way to do that is for Americans of faith to rise up and inject biblical values and godly principles into government, culture, and society, and put God once again at the center. It's time to demand the God-given, or the great American experiment will come to an end.

[America's Frozen Neighborhoods](#) Robert C. Ellickson, 2022-10-18 This book examines local zoning policies and suggests reforms that states and the federal government might adopt to counter the negative effects of exclusionary zoning. In this book, Robert Ellickson asserts that local zoning policies are the most consequential regulatory program in the United States. Many localities have

created barriers to the development of less costly forms of housing Numerous economists have found that current zoning practices inflict major damage on the national economy Using Silicon Valley the Greater New Haven area and the northwestern portion of Greater Austin as case studies Ellickson shows in unprecedented detail how the zoning system works and recommends steps for its reform Zoning regulations Ellickson demonstrates are hard to dislodge once localities have enacted them He develops metrics to measure the existence and costs of exclusionary zoning and suggests reforms that states and the federal government could undertake to counter the detrimental effects of local policies These include the cartelization of housing markets and the aggravation of racial and class segregation
