Control Valves And Labview:

Control Valves and LabVIEW Deepesh Namdev, Dhanushipra Sheela, Neeraj Pareta, 2012-06 The importance of this book is emphasized on the fundamental concepts and principles of various types of control valves and into the LABVIEW environment of industrial process Control valves are an increasingly vital component of modern manufacturing around the world Properly selected and maintained control valves increase efficiency safety and profitability The purpose of LABVIEW is to create graphical programming and virtual instruments LABVIEW contains a comprehensive set of tools for acquiring displaying and storing data as well as tools to help you troubleshoot code you write The use of LabVIEW software development platform combined with data acquisition cards and Datasocket communication protocol achieves long range data transmission Comparing with the traditional data acquisition and processing system it has the advantages of cost effective high universality easy to development high portability and so on This can make the users who do not have much experience free from the heavy programmers make the users invest more effort in the testing data analysis and processing

Practical Applications and Solutions Using LabVIEW™ Software Silviu Folea, 2011-08-01 The book consists of 21 chapters which present interesting applications implemented using the LabVIEW environment belonging to several distinct fields such as engineering fault diagnosis medicine remote access laboratory internet communications chemistry physics etc The virtual instruments designed and implemented in LabVIEW provide the advantages of being more intuitive of reducing the implementation time and of being portable The audience for this book includes PhD students researchers engineers and professionals who are interested in finding out new tools developed using LabVIEW Some chapters present interesting ideas and very detailed solutions which offer the immediate possibility of making fast innovations and of generating better products for the market The effort made by all the scientists who contributed to editing this book was significant and as a result new and viable applications were presented

Augmented Reality, Virtual Reality, and Computer Graphics Lucio Tommaso De Paolis, Patrick Bourdot, 2018-07-13 The 2 volume set LNCS 10850 and 10851 constitutes the refereed proceedings of the 5th International Conference on Augmented Reality Virtual Reality and Computer Graphics AVR 2018 held in Otranto Italy in June 2018 The 67 full papers and 26 short papers presented were carefully reviewed and selected from numerous submissions The papers are organized in the following topical sections virtual reality augmented and mixed reality computer graphics human computer interaction applications of VR AR in medicine and applications of VR AR in cultural heritage and applications of VR AR in industry

[Industrial Engineering: Concepts, Methodologies, Tools, and Applications](#) Management Association, Information Resources, 2012-08-31 Industrial engineering affects all levels of society with innovations in manufacturing and other forms of engineering oftentimes spawning cultural or educational shifts along with new technologies Industrial Engineering Concepts Methodologies Tools and Applications serves as a vital compendium of research detailing the latest research theories and case studies on industrial engineering Bringing together contributions

from authors around the world this three volume collection represents the most sophisticated research and developments from the field of industrial engineering and will prove a valuable resource for researchers academics and practitioners alike

Internet Accessible Remote Laboratories: Scalable E-Learning Tools for Engineering and Science Disciplines Azad, Abul K.M.,Auer, Michael E.,Harward, V. Judson,2011-11-30 This book presents current developments in the multidisciplinary creation of Internet accessible remote laboratories offering perspectives on teaching with online laboratories pedagogical design system architectures for remote laboratories future trends and policy issues in the use of remote laboratories Provided by publisher Emerging Technologies in NDT Gerhard Busse,Danny Van Hemelrijck,Igor Solodov,Athanasios Anastasopoulos,2008-04-16 Non destructive testing NDT is a pertinent task in nearly every field of human activity from the assuring of aircraft integrity to the evaluation of infrastructural decay caused by deterioration or damage The development of non destructive methods for quality management results in economic and environmental benefits in an increase in *PID output fuzzified water level control in MIMO coupled tank system* Vishal Vasistha,2014-04-02 Master s Thesis from the year 2013 in the subject Engineering Mechanical Engineering grade Good course Mechatronics language English abstract The PID controllers are widely used in industry control applications due to their effectiveness and simplicity This project presents PID controller design for MIMO coupled water tank level control system that is second order system PID Controller output is fuzzified to control water level in coupled tank system Simulation has been done in Matlab Simulink library with verification of mathematical model of controller PID controller design and program has been prepared in LabVIEW At the place of proportional valve combinations of solenoid valves are used The NI DAQ card is used for interfacing between hardware and LabVIEW software Experiment is fully triggered by LabVIEW Simulated results are compared with experimental results
