Making Great Strategy Glenn R. Carroll, Jesper B. Sørensen, 2021-01-26. Making strategy requires undertaking major, often irreversible decisions aimed at long-term success in an uncertain future. All leaders must formulate a clear course of action, yet many lack confidence in their ability to think systematically about their strategy. They struggle to apply the abstract lessons offered by conventional approaches to strategic analysis to their unique contexts. *Making Great Strategy* resolves these challenges with a straightforward, readily applicable framework. Jesper B. Sørensen and Glenn R. Carroll show that one factor underlies all sustainably successful strategies: a logically coherent argument that connects resources, capabilities, and environmental conditions to desired outcomes. They introduce a system for formulating and managing strategy through a set of three core activities: visualization, formalization, and logic and constructive argumentation. These activities can be implemented in any organization and are illustrated through examples and case studies from well-known companies such as Apple, Walmart, and The Economist. This book shows that while great strategic thinking is hard, it is not a mystery. Widely applicable and relevant for managers and leaders at all levels, especially executive teams charged with setting the course of their organizations, it is essential reading for anyone faced with practical problems of strategic management.

Perspectives on Digital Humanism Hannes Werthner, Erich Prem, Edward A. Lee, Carlo Ghezzi, 2021-11-23. This open access book aims to set an agenda for research and action in the field of Digital Humanism through short essays written by selected thinkers from a variety of disciplines, including computer science, philosophy, education, law, economics, history, anthropology, political science, and sociology. This initiative emerged from the Vienna Manifesto on Digital Humanism and the associated lecture series Digital Humanism, which deals with the complex relationships between people and machines in digital times. It acknowledges the potential of information technology. At the same time, it points to societal threats such as privacy violations and ethical concerns around artificial intelligence, automation, and loss of jobs, ongoing monopolization on the Web, and sovereignty. Digital Humanism aims to address these topics with a sense of urgency but with a constructive mindset. The book argues for a Digital Humanism that analyses and, most importantly, influences the complex interplay of technology and humankind toward a better society and life.

while fully respecting universal human rights It is a call to shaping technologies in accordance with human values and needs
