

INTRODUCTION TO SCRATCH PROGRAMMING

The screenshot displays the Scratch 2.0 interface. On the left, a palette of blocks is visible, categorized into Motion, Looks, Sound, Sprites, and Data. The main workspace is divided into a script area on the left and a stage area on the right. The script area contains several 'when green flag clicked' blocks, each followed by a 'say' block and a 'wait' block. The stage area shows a cat sprite with a 'say' block and a 'wait' block. The top of the window shows the Scratch logo and navigation buttons.

Handbook of Research on Using Educational Robotics to Facilitate Student Learning Papadakis, Stamatios, Kalogiannakis, Michail, 2020-12-05 Over the last few years increasing attention has been focused on the development of children's acquisition of 21st century skills and digital competences Consequently many education scholars have argued that teaching technology to young children is vital in keeping up with 21st century employment patterns Technologies such as those that involve robotics or coding apps come at a time when the demand for computing jobs around the globe is at an all time high while its supply is at an all time low There is no doubt that coding with robotics is a wonderful tool for learners of all ages as it provides a catalyst to introduce them to computational thinking algorithmic thinking and project management Additionally recent studies argue that the use of a developmentally appropriate robotics curriculum can help to change negative stereotypes and ideas children may initially have about technology and engineering The Handbook of Research on Using Educational Robotics to Facilitate Student Learning is an edited book that advocates for a new approach to computational thinking and computing education with the use of educational robotics and coding apps The book argues that while learning about computing young people should also have opportunities to create with computing which have a direct impact on their lives and their communities It develops two key dimensions for understanding and developing educational experiences that support students in engaging in computational action 1 computational identity which shows the importance of young people's development of scientific identity for future STEM growth and 2 digital empowerment to instill the belief that they can put their computational identity into action in authentic and meaningful ways Covering subthemes including student competency and assessment programming education and teacher and mentor development this book is ideal for teachers instructional designers educational technology developers school administrators academicians researchers and students *Learning and Collaboration Technologies: Games and Virtual Environments for Learning* Panayiotis Zaphiris, Andri Ioannou, 2021-07-03 This two volume set LNCS 12784 and 12785 constitutes the refereed proceedings of the 8th International Conference on Learning and Collaboration Technologies LCT 2021 held as Part of the 23rd International Conference HCI International 2021 which took place in July 2021 Due to COVID 19 pandemic the conference was held virtually The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions The papers of LCT 2021 Part II focus on Games and Gamification in Learning Chatbots in Learning AR VR and Robots in Learning *Advances in Web-Based Learning -- ICWL 2013* Jhing-Fa Wang, Rynson Lau, 2013-09-08 This book constitutes the refereed proceedings of the 12th International Conference on Web Based Learning ICWL 2013 held in Kenting Taiwan in October 2013 The 34 revised full papers presented were carefully reviewed and selected from about 117 submissions The papers are organized in topical sections on interactive learning environments design model and framework of e learning systems personalized and adaptive learning Web 2.0 and social learning environments intelligent tools for visual learning semantic
