

An aerial photograph of a lush green valley with terraced rice fields. The terraces are arranged in neat, curved rows that follow the contours of the hills. A winding road or path is visible in the center of the valley, and there are some small buildings or structures scattered throughout. The background shows more hills and a clear sky.

regard transformative research as something to be encouraged and funded through special programs Assessments of transformative research funding initiatives are few and provide a mixed picture of their effectiveness The challenge is whether transformative research can be identified at the time it is proposed rather than after it has been conducted communicated and its influence on the discipline has become clear Fostering Transformative Research in the Geographical Sciences reviews how transformative research has emerged in the past what its early markers were and makes recommendations for how it can be nurtured in the future
