On Risk Mark Kingwell,2020-10-13 With COVID 19 comes a heightened sense of everyday risk How should a society manage distribute and conceive of it As we cope with the lengthening effects of the global COVID 19 pandemic considerations of everyday risk have been more pressing and inescapable In the past everyone engaged in some degree of risky behaviour from mundane realities like taking a shower or getting into a car to purposely thrill seeking activities like rock climbing or BASE jumping Many activities that seemed high risk such as flying were claimed basically safe But risk was and always has been a fact of life With new focus on the risks of even leaving the safety of our homes it s time for a deeper consideration of risk itself How do we manage and distribute risks How do we predict uncertain outcomes If risk can never be completely eliminated can it perhaps be controlled At the heart of these questions which govern everything from waking up each day to the abstract mathematics of actuarial science lie philosophical issues of life death and danger Mortality is the event horizon of daily risk How should we conceive of it
