

Project Proposal Outline

The following is an example of how to write an effective proposal for a course project. The purpose of this example is to show basic ideas that can be implemented on any proposal. - For what reasons is this a problem that deserves attention? How is it significant or interesting?
- Why does the problem occur, when does it happen, and where can it be located?
- Are there any solutions to the problem that currently exist? Are they effective?
- If there are similar solutions to yours, why will yours be more successful?
- Do you see a way to improve upon current solutions?
- What do you want to achieve with this project? Do not include specific details, but give a general statement about what this project will accomplish.

3. Project details

- Environment (2 paragraphs, possibly a bit more)
 - i. Give a description of the project environment, including languages, software, and hardware.
 - ii. Use diagrams or charts to demonstrate your point, if some are available.
 - iii. What types of software and hardware will be used?

 - ii. In what ways are you using or extending existant tools and systems for your problem?

 - iii. What features do the project's products have?
