Human Interaction, Emerging Technologies and Future Applications IV Tareq Ahram, Redha Taiar, Fabienne Groff, 2021-04-15 This book reports on research and developments in human technology interaction. A special emphasis is given to human computer interaction and its implementation for a wide range of purposes such as healthcare, manufacturing, transportation, and education among others. The human aspects are analyzed in detail. Innovative studies related to human centered design, wearable technologies, augmented virtual and mixed reality simulation, as well as developments and applications of machine learning and AI for different purposes represent the core of the book. Emerging issues in business security and infrastructure are also critically examined, thus offering a timely, scientifically grounded but also professionally oriented snapshot of the current state of the field. The book is based on contributions presented at the 4th International Conference on Human Interaction and Emerging Technologies Future Applications (IHET AI 2021) held on April 28-30, 2021 in Strasbourg, France. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems.

Your Money, Their Algorithm Joseph Trekk, 2026-02-19 In an era where apps nudge you to trade and algorithms decide your creditworthiness, the rules of money have quietly shifted beneath our feet. This book answers the critical question: defining modern wealth. How do you use powerful financial technology without letting it use you? Designed for the everyday investor, the curious consumer, and anyone wondering why their loan was denied by a black box, this guide cuts through the technical jargon to reveal the machinery driving your financial life. You will discover how free trading apps monetize your psychology through gamification and why your robo advisor's personalized strategy might just be a standard template in disguise. We explore the invisible gatekeepers of the data economy, revealing how AI impacts everything from your car insurance premiums to your ability to buy a home. From the math of compounding to the perils of deepfakes, you will learn to distinguish between genuine financial innovation and dangerous marketing hype. Unlike dry textbooks or sensationalist tech forecasts, this book blends timeless wealth-building principles with a clear-eyed look at the digital future. It offers a practical playbook for the human in the loop, providing actionable checklists to help you secure your data, optimize your portfolio, and reclaim control of your financial destiny in an automated world.
