Reading Reflex Carmen Mcguinness, Geoffrey Mcguinness, 1999-08-19 Describes the reading education system and provides detailed instructions and diagnostic tests for use by parents

Literacy and Education Uta Papen, 2015-07-16 Literacy is a perennial hot topic in Britain and other English speaking countries Concerns about falling standards and a literacy crisis are frequently raised In response governments initiate new policies and teaching guidelines This book addresses the current policies practices and media debates in England the US Scotland and Australia Literacy and Education examines How literacy is taught to children in primary schools The place of phonics in current policies and the arguments made for and against it How teachers deliver phonics lessons and how children engage with the method The range of literacy practices children engage with throughout the school day and how they contribute to literacy learning The contributions a social and critical perspective on literacy can make to current debates regarding teaching strategies A wide range of research conducted in the UK North America Australia and other countries Bringing together policy practice and public debate and drawing on the author s extensive research in a primary school this essential new textbook provides questions and tasks for readers to engage with Literacy and Education is ideal for advanced undergraduate and postgraduate students of literacy and education and students on PGCE courses It will also be of interest to researchers and teachers

Literacy, Power, and the Schooled Body Kerry Dixon, 2010-11-15 What effects do space and time have on classroom management discipline and regulation How do teachers practices create schooled and literate students To explore these questions this book looks at early childhood classrooms charting the shifts and continuities as four year old children begin preschool move from preschool into primary school and come to the end of the first phase of schooling at nine years The literacy classroom is used as a specific site in which to examine how children s bodies are disciplined to become literate This is not a book that theorizes space time discipline bodies and literacy in abstract ways Rather working from a Foucaultian premise that discipline is directed onto children s bodies it moves from theory to practice Photographs lesson transcripts interviews and children s work show how teachers practices are enacted on children s bodies in time and space In this way teachers are offered practical examples from which to think about their own classrooms and classroom practice and to reflect on what works why it works and what can be changed
