*The Real Work of Data Science* Ron S. Kenett,Thomas C. Redman,2019-03-26 The essential guide for data scientists and for leaders who must get more from their data science teams The Economist boldly claims that data are now the world s most valuable resource But as Kenett and Redman so richly describe unlocking that value requires far more than technical excellence The Real Work of Data Science explores understanding the problems dealing with quality issues building trust with decision makers putting data science teams in the right organizational spots and helping companies become data driven This is the work that spells the difference between a good data scientist and a great one between a team that makes marginal contributions and one that drives the business between a company that gains some value from its data and one in which data truly is the most valuable resource These two authors are world class experts on analytics data management and data quality they ve forgotten more about these topics than most of us will ever know Their book is pragmatic understandable and focused on what really counts If you want to do data science in any capacity you need to read it Thomas

H Davenport Distinguished Professor Babson College and Fellow MIT Initiative on the Digital Economy I like your book The chapters address problems that have faced statisticians for generations updated to reflect today s issues such as computational Big Data Sir David Cox Warden of Nuffield College and Professor of Statistics Oxford University Data science is critical for competitiveness for good government for correct decisions But what is data science Kenett and Redman give by far the best introduction to the subject I have seen anywhere They address the critical questions of formulating the right problem collecting the right data doing the right analyses making the right decisions and measuring the actual impact of the decisions This book should become required reading in statistics and computer science departments business schools analytics institutes and most importantly by all business managers A Blanton Godfrey Joseph D Moore Distinguished University Professor Wilson College of Textiles North Carolina State University *Probability and Statistics for Engineering and the Sciences* Jay L.
