Answer In A Different Color or by hand. 18 points

1. Explain the likely process of fossilization for each of these organisms: (3)
 - a. Mosquito:
Since the mosquito does not have a hard body it would probably be buried in amber.
 - b. Lizard:
A lizard has hard, bony parts so it would probably be fossilized by mineralization.
 - c. Hermit crab:
Since a hermit crab has a shell it would probably leave an imprint or mold in the mud that then hardens.
2. Describe the steps (conditions) that will prevent fossilization. Which is more likely, the conditions allowing fossilization or those that prevent it? Explain. (3) If the organism is eaten or broken down by aerobic microbes, bacteria, or water no fossil will form. It is more likely for a fossil to not form because the conditions have to be perfect for a fossil to form.
3. Why do paleontologists think that modern-day horses arose from a four-toed ancestor? (1) The fossils show a series of changes in bone structure and the closer to fossils get to us time wise, the more it resembles our modern horse.
4. Compare and contrast relative and radiometric dating by filling in the table: (3)

	Relative dating (yes/no)	Radiometric dating (yes/no)
Can arrange fossils in the correct sequence from oldest to youngest	YES	YES
Can provide an estimate of	NO	YES

Macroeconomics (With Study Guide Cd-rom) Jagdish Handa,2010-09-24 This book presents the stylized facts on the important variables output inflation money supply and interest rates etc of the macro economy and uses them to differentiate how well particular economic theories perform or fail to do so On the determination of aggregate demand this book presents two approaches the traditional IS LM analysis under the assumption that the money supply is exogenous because the central bank uses its monetary policy to control it and the emerging IS IRT analysis under the assumption that the interest rate is the exogenous monetary policy variable set by the central bank to manipulate aggregate demand in the economy The IS IRT analysis is important for the macro analyses of many economies yet is totally neglected in most textbooks on macroeconomics The chapter on Paradigms in Economics introduces students to the heritage of ideas in macroeconomics and the evolution of ideas and approaches over the last two centuries It also provides the justification for the simultaneous relevance of both Classical ideas and Keynesian ones The two growth theory chapters go beyond the Solow growth model to cover the broad evolution of growth from Malthus s theory to the present endogenous approaches and the link between money supply inflation and growth over very long periods *Bible Study Guide: Job Volume 1* Andrew J.
