Welch, Gerry F. Welch, 2016-02-01 *The Long Wave in Economic Life* J.J. Van Duijn, 2013-11-05 Of all fluctuations in economic activity the long wave or Kondratieff cycle is easily the most puzzling and least understood one Does it really exist and if so is it only a cycle in prices or a cycle in economic activity at large What causes it and has it been confined to Europe or does it affect the world economy as a whole These questions which seemed of little relevance in the prosperous years of the postwar growth era have gained new importance since 1973 With the downturn of the long wave interest in it has enjoyed a revival as it did in the 1930s A great number of publications on the long wave have appeared since 1973 many of which have added to our insight of what causes the recurrent alternations of growth acceleration and retardation This book is the first in the English language in which all important long wave theories old as well as recent are brought together It focuses on the long wave as an international phenomenon affecting all industrialised countries It contains new theory as well as empirical evidence and in the final section suggests a number of policy recommendations to generate innovation This book offers an interpretation of long term economic development different from those commonly found in the literature It will be of interest to students and scholars of the economics of growth and change as well as to economic historians and policy makers This book was first published in 1983 **The Economics of Instalment Selling** Edwin Robert Anderson Seligman, 1927 **The Economics of Instalment Selling: Credit Risks** Edwin Robert Anderson Seligman, 1927 [Economics: Theory and Practice, 11th Edition WileyPLUS Learning Space LMS Card](#) Gerry F. Welch, 2016-01-26 **Economics** Patrick J. Welch, Gerry F. Welch, 2016-02-01 *Economics* Patrick J. Welch, Gerry F. Welch, 2016-02-01 **The Political Economy and Ethics of Debt Financing** Patrick O'Sullivan, Paolo Ricci, 2024-12-04 This book takes a fresh look at an age old controversy in ethics and political economy that stretches right back to Aristotle the morality and the economics of debt financing or the charging of interest on loans It endeavours to show the immense relevance of those ancient debates in the contemporary economy Outside of countries which practise Islam and Islamic finance the charging of interest is taken completely for granted today and little or no thought is devoted to its morality or economic and social impacts This book argues that in fact the question of the morality of charging interest is still debatable and deserves to be considered anew in the 21st century for the light it can shine on certain salient contemporary sources of economic malaise This book will first of all review the ancient debates on these questions stretching back to Aristotle seeking to restate the concerns in terms of contemporary economic theories and realities It will also then delve into the current practices in respect of lending of all kinds that can be found in those Islamic countries and financial institutions which endeavour to follow the prohibition of riba charging of any kind of interest This will be contrasted with the impact of interest and debt financing in the contemporary non Islamic economies arguing that debt financing of businesses promotes greater rates of bankruptcy over the business cycle and that the charging of interest on

loans for current consumption purposes will over time increase inequality and inequitable concentration of wealth in societies where it is practised It will also be shown how in a system without predetermined interest charges problems of exponentially exploding government debt could largely and neatly be avoided by linking bondholder rewards to levels of fiscal proceeds of states This book will be of significant interest to readers in ethics moral philosophy and political economy as well as to policymakers and thinkers grappling with issues around debt burdens public and private inequality and fairness

The Wealth or Health of Nations Carol Johnston,2010-10-01 Why has our society become so focused on money and at what human cost Carol Johnston explores the value assumptions of Western economic theory revealing what economists contributed and what opportunities were missed as the theory kept narrowing until only market decisions were considered and money became the only reality She then offers a proposal to transform the focus of capitalism from wealth to community and national health

Knowledge, Innovation and Economy Witold Kwasnicki,1996-01-01 In this book the author examines industrial dynamics from an evolutionary perspective applying a biological model to the analysis of economic problems
