**Generative and Open AI in Industry 5.0** Sangeeta Sharma, Robin Singh Bhadoria, Mukesh Kumar Giluka, 2026-04-23  
This book provides an up to date and easy to read introduction to Generative AI and its revolutionary contribution to building Industry 5.0. Written for both practitioners and interested readers it is a clear and compelling overview of the technologies at the heart of the next industrial revolution. The book introduces the conceptual notions behind generative models, large language models, LLMs and the neural networks that drive them. It delves into the mathematical and conceptual foundations of Generative AI, transformer architecture and the practical applications of language and vision models. Further, the book links the innovations to Industry 5.0, discussing digital twins, predictive maintenance, DevOps and cybersecurity in intelligent systems. It encompasses real world applications of AI in areas such as finance, manufacturing and smart infrastructure. Case studies like the application of generative models in FinTech and blockchain adoption underscore how AI is already transforming business and society around the world. The book is perfect for students, researchers and practitioners of AI, data science and industrial systems interested in comprehending the theory and practical applications of Generative AI. It also benefits educators and policymakers who wish to lead in cutting edge technological advancements with emphasis on responsible, secure and human oriented AI applications for a brighter future.

**LEADING IN THE AGE OF AI** Surinder Lall, 2026-03-13  
Leading in the Age of AI. By Surinder Lall. We are entering a world where machines can think, create and decide, yet the real question is not what AI can do but how we choose to lead alongside it. In Leading in the Age of AI, cybersecurity and AI governance expert Surinder Lall draws on more than twenty five years of experience advising global organisations, governments and technology leaders. This is not a technical manual. It is a leadership playbook for a new era, one where decisions made today will shape not just businesses but society itself. Blending real world case studies with timeless philosophical insight, the book explores what it means to lead responsibly in an age defined by intelligent systems. It moves beyond theory to provide practical guidance on navigating risk, building trust and making decisions under uncertainty when the pace of change often outstrips regulation and the consequences of failure are no longer contained. At its core, this book is about accountability. It challenges leaders to think differently about power, ethics and responsibility in a world where algorithms increasingly influence outcomes. From AI governance and security to culture, resilience and decision making under pressure, it offers a grounded, experience driven perspective on what effective leadership now demands. This is not a book about the future. It is about the choices we are already making and the kind of leaders we must become because of them.

*Beyond and After Prompt Engineering: The Future of AI Communication* Vladimir Geroimenko, 2025-12-02 This pioneering book offers both a practical guide and a conceptual manifesto for rethinking our relationship with AI exploring the future of AI communication and moving beyond traditional prompt engineering towards more natural intuitive multimodal and context

aware interactions It examines the personal cultural ethical and philosophical aspects of AI communication providing insights into how machines can comprehend context establish rapport exhibit emotional intelligence and collaborate effectively with humans The book outlines the key communication principles essential for ensuring clarity trust adaptability and mutual understanding in increasingly complex human AI dialogues Structured across 16 chapters and organised into three parts conceptual foundations communicative principles and future trajectories this volume combines in depth analysis with numerous real world examples and forward looking scenarios It is richly illustrated with 142 conceptual diagrams that clarify complex ideas and serve as visual companions to the narrative Covering both near term advancements and long term speculative trends this book serves as an essential guide for AI developers practitioners educators students and anyone interested in communicating more effectively with increasingly sophisticated AI systems

Datafied Democracies & AI Economics Unplugged Igor Calzada, 2026-01-01 This book explores how AI Economics innovation systems and policies data cooperatives and data sovereignty are redefining democracy governance and economic life in datafied societies Through global case studies it examines how smart cities generative AI GenAI and decentralization shape the emergence of datafied democracies network states and algorithmic nations It asks whether these transformations can foster anticipatory governance and democratic renewal or instead reinforce inequality and technocratic control Engaging with themes such as technopolitics digital sovereignty and post Westphalian forms of governance the book bridges political economy urban studies and innovation policy to illuminate the evolving relationship between power technology and democracy Without being utopian or dystopian it advances a civic and institutional framework for aligning technological disruption with digital inclusion strategies Offering policymakers researchers and civic leaders an integrated roadmap it outlines how citizens institutions and AI systems in smart cities and network states can share responsibility for shaping more inclusive accountable and innovative digital futures

**Empire of AI** Karen Hao, 2025-05-20 A New York Times Notable Book Finalist for the National Book Critics Circle Award An Instant New York Times Bestseller Named a Best Book of the Year by Smithsonian Scientific American and Elle A bestselling page turner that has made waves not just in Silicon Valley but around the world With Empire of AI Hao is fundamentally shaping many people's perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and

potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era

[Exploring GPT-3](#) Steve Tingiris, Bret Kinsella, 2021-08-27. Get started with GPT-3 and the OpenAI API for natural language processing using JavaScript and Python. Key Features: Understand the power of potential GPT-3 language models and the risks involved; Explore core GPT-3 use cases such as text generation, classification, and semantic search using engaging examples; Plan and prepare a GPT-3 application for the OpenAI review process required for publishing a live application. Book Description: Generative Pre-trained Transformer 3 (GPT-3) is a highly advanced language model from OpenAI that can generate written text that is virtually indistinguishable from text written by humans. Whether you have a technical or non-technical background, this book will help you understand and start working with GPT-3 and the OpenAI API. If you want to get hands-on with leveraging artificial intelligence for natural language processing (NLP) tasks, this easy-to-follow book will help you get started. Beginning with a high-level introduction to NLP and GPT-3, the book takes you through practical examples that show how to leverage the OpenAI API and GPT-3 for text generation, classification, and semantic search. You'll explore the capabilities of the OpenAI API and GPT-3 and find out which NLP use cases GPT-3 is best suited for. You'll also learn how to use the API and optimize requests for the best possible results. With examples focusing on the OpenAI Playground and easy-to-follow JavaScript and Python code samples, the book illustrates the possible applications of GPT-3 in production. By the end of this book, you'll understand the best use cases for GPT-3 and how to integrate the OpenAI API in your applications for a wide array of NLP tasks. What you will learn: Understand what GPT-3 is and how it can be used for various NLP tasks; Get a high-level introduction to GPT-3 and the OpenAI API; Implement JavaScript and Python code examples that call the OpenAI API; Structure GPT-3 prompts and options to get the best possible results; Select the right GPT-3 engine or model to optimize for speed and cost efficiency; Find out which use cases would not be suitable for GPT-3; Create a GPT-3

powered knowledge base application that follows OpenAI guidelines Who this book is for Exploring GPT 3 is for anyone interested in natural language processing or learning GPT 3 with or without a technical background Developers product managers entrepreneurs and hobbyists looking to get to grips with NLP AI and GPT 3 will find this book useful Basic computer skills are all you need to get the most out of this book [Mastering OpenAI API Security □ Developer Blueprint to Prevent Key Leaks & AI Threats](#) Siddapallyanandraj,2026-02-09 OpenAI API Key leaks are becoming one of the biggest risks for developers building AI apps In this video you ll learn the complete security blueprint to protect your OpenAI API keys prevent misuse and defend against modern AI enabled threats Inside this Developer Blueprint we cover Verified API Key Generation Budget Limits Financial Guardrails Zero Hardcoding Policies Secrets Management Least Privilege Access Control Static Key Leak Dangers Threat Intelligence Sources Tools Governance Compliance Best Practices The Human Firewall MFA Anti Phishing Defense This is a must watch for AI developers startups SaaS builders and cybersecurity professionals working with OpenAI APIs Stay secure Build responsibly Protect your AI systems Subscribe for more AI Security Developer Guides
