"Crush on Obama." A Case Study on the Impact of YouTube-Videos on Political Campaigning Anna Poppen, 2014-06-06 Seminar paper from the year 2011 in the subject Didactics for the subject English Applied Geography grade 1 0 Carl von Ossietzky University of Oldenburg language English abstract The video sharing website YouTube has become a phenomenon that is part of an increasing number of people's lives and also a part of the usual presidential rhetoric Before the launch of YouTube in 2005 the enormous effects of this online phenomenon on all aspects of society could hardly be foreseen In 2011 however it is obvious that YouTube and other online media affect every day life including political decision making in many ways The 2004 US presidential election is often referred to as the first internet election as the candidate Howard Dean in particular started to use blogs and websites to raise money and convince voters online Zielmann R ttger 2009 77 By 2008 the internet had become even more diverse and complex and offered a lot of new online functions like social networking sites Facebook and video sharing sites YouTube These new opportunities were used by most of the candidates in the 2008 presidential election The later US President Barack Obama as well as his internal opponent Hillary Clinton made use of the internet to spread their political messages and address especially the younger voters A study that was conducted by the Pew Internet American Life Project during the 2008 election campaign proved that 40% of all adults accessed information about politics on the internet It also showed that viewers of politically relevant YouTube videos had become a key part of at least some campaign events Rainie Smith 2008 In 2008 the online world was not new to most people but it was used as a major propaganda tool by most politicians and their campaign teams for the first time In the Democratic primary elections several candidates did not announce their candidacy in the traditional press but online On July 23 2007 the first ever political debate took place on YouTube

political problem Looking at these issues through the analytical framework of social networks brings forward a welcomed investigation into agency in international studies The attention to personal and political ties of mutual interdependence differs from more commonly used mainstream accounts of global politics that rely on US versus Russia narratives or on corporate elites pursuing business deals This book shows how close ties of social acquaintance and political economic compacts prove crucial to understanding how the key issue areas evolved This book advances the understanding of how power works in international politics showing how it is built through different forms It also advances the understanding of how global elite networks are formed and operate along with specific investigation into the importance of gatekeepers and thus explains the international political economy of Ukraine at a key moment and should prove invaluable to many academic and popular explanations
