oct 1 2019 pdf mathematical models for rolling force calculation during hot rolling are crucial for both automatic mill operation and prediction of steel find read and cite all the research you need

**the calculation of roll force and torque in cold strip rolling** - Feb 03 2022

from an approximate theory equations are derived for roll force and torque with and without front and back tensions applied to the strip where tensions are applied the calculations for each pass take about an hour without tensions and with the use of curves given in this paper they can be carried out in ten minutes

abstract equations are derived for the normal roll pressure specific roll load and torque in hot rolling mills using the condition for plastic deformation in rolling derived by Rowan together with von Kármán's equation of equilibrium although applying strictly to the rolling of ideal plastic rigid materials these equations may be

**a rapid calculation method for predicting roll deformation of six** - Dec 13 2022

sep 15 2018 therefore a rapid calculation method for predicting roll deformation of a six high rolling mill was proposed which employed the finite difference method to calculate the roll deflection and used a polynomial to describe the nonlinear relationship between roll flattening and roll contact pressure

[calculating power parameters of rolling mill proquest](#) - Apr 17 2023

1 introduction rolling mills for the production of steel wire are classified according to the number of mill stand rolls which form the geometry of the deformation zone accordingly these can be categorised by the type of roll groove and the roll transmission path
